County of Fairfax, Virginia

To protect and enrich the quality of life for the people, neighborhoods and diverse communities of Fairfax County

November 22, 2016

Dear Members of the Board of Trustees:

I am pleased to submit to you the annual report of the Fairfax County Police Officers Retirement System (System) for the fiscal year ended June 30, 2016. This annual report is provided as an aid to understanding the structure and evaluating the status of the System. The System's management is responsible for the accuracy of financial information contained herein. The Management's Discussion and Analysis provides further detail to the financial statements.

History

The Fairfax County Police Officers Retirement System was created under authority granted by Chapter 303 of the Acts of Assembly (law of the Commonwealth of Virginia) on March 29, 1944, to provide defined benefit pension plan coverage for sworn full-time law enforcement officers of the Fairfax County Police Department. In 1981 Fairfax County enacted Article 7 of the Fairfax County Code, which adopted and continued Chapter 303 as amended. There were 1,319 active members, 75 in the Deferred Retirement Option Program (DROP), 47 vested members and 1,039 retirees participating in the System as of June 30, 2016. For calculations surrounding the Total Pension Liability and its components, Cheiron, the System's actuary, used June 30, 2016, as the measurement date which coincides with the actuarial valuation date.

Provisions

The benefit provisions of the System are established by County Ordinance. The System provides normal service retirement and early service retirement benefits for members who attain age or service requirements. Coverage for service-connected disability benefits is immediate upon membership in the System. Ordinary (non-service-related) disability benefits are provided after the attainment of five years of service. Members are vested after five years of service and are eligible for benefits at the early or normal service retirement date.

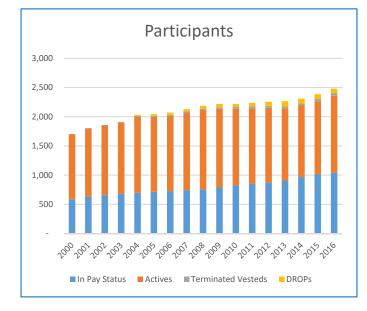

Capital Markets and Economic Conditions

In fiscal year 2016, the System's investment returns were challenged by market downturns in a number of asset classes. The System's portfolio return for the year was 1.1% (0.9 %, net of fees), lagging the long term return target of 7.25%. This return placed in the 44th percentile of the BNY Mellon universe of public funds. However, over the long term, returns compared even more favorably, with investment returns for the ten-year period were 6.1% per year, ranking the fund in the top 11th percentile of all other public funds in the BNY Mellon universe. Additional details on the markets and the System's investments are provided in the Investment Section.

Fairfax County Police Officers Retirement System

Additional details on the markets and the System's investments are provided in the Investment Section.

Internal and Budgetary Controls

The System's management is responsible for the financial information presented in this report in accordance with U.S. generally accepted accounting principles. Proper internal accounting controls exist to provide reasonable, but not absolute, assurance for both the safekeeping of assets and the fair presentation of the financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the valuation of costs and benefits requires estimates and judgments by management.

Investment Policies and Strategies

The Board of Trustees has adopted a Statement of Investment Objectives and Policy. This Statement establishes the investment goals, guidelines, constraints and performance standards that the Board of Trustees uses when exercising its fiduciary duties to manage the investment assets of the System. The Board operates in conformity with the standard of care required in making investments as stated in the Code of Virginia §51.1-803. Please see Footnote 3 to the Financial Section of this report for a description of this standard of care and details on the System's investment policies and strategies.

The Board receives quarterly reporting from staff to ensure compliance with its stated objectives and policy. Staff also monitors the performance of the System and its investment managers and updates the Board on a monthly basis throughout the year. Rate of return information is included in the Investment Section, prepared internally by staff using data from the System and investment managers.

Securities of the System, except for the pooled funds and the County's pooled cash and temporary investments, are held in safekeeping, on the System's behalf, by BNY Mellon Asset Servicing as agent. The BNY Mellon Financial Corporation, the parent company, carries Financial Institution bond insurance coverage including a Computer Crime Policy. An additional Excess Securities policy covers all risk of physical loss to securities.

Funded Status

An actuarial valuation of the System to determine funding requirements is performed annually. The System's funding policy provides for periodic employer contributions at actuarially determined rates which are calculated as a percentage of current payroll, and are adjusted as necessary to accumulate sufficient assets to meet the costs of benefit payments when due. The valuation of the System performed as of June 30, 2016, indicated that the ratio of assets accumulated by the System to total actuarial accrued liabilities for benefits showed a decrease from 86.5% to 85.4%. The actuarial section contains further information on the results of the June 30, 2016, valuation. For purposes of calculating the net pension liability as of June, 30, 2016, in accordance with Governmental Accounting Standards Board's (GASB) Statement Number 67, the System's funded status was 81.4%.

Based on the June 30, 2015, actuarial valuation, the employer contribution rate for 2016 following the adopted corridor-based funding policy was 37.98%, an increase of 1.16% from the 2015 rate of 36.82%. This was done to improve the funded level of the plan, accomplished by raising the target unfunded liability amortization level from 93% to 95%, and to offset a decrease in the employee contribution rate (discussed further below).

Major Initiatives

Working in concert with the County's Chief Financial Officer, the System's actuary (Cheiron), and other County staff, efforts continue to improve the funded status of the Plan. As a result of this work, and as referenced above, the County has increased the employer contribution rate above what was required by the adopted corridor-based funding policy for three consecutive years. This was accomplished by increasing the target amortization level for the unfunded liability from 90% in prior years to 91% in 2014 and 95% in 2016. This target was further increased to 97% for the County's 2017 adopted budget.

A five year actuarial experience study was completed by the System's actuary in early 2016, which entailed a detailed review of trends in salaries, decrement rates, inflation, mortality, investment returns, and other economic and demographic assumptions. The valuation date and data methodology were also reviewed.

Several major customer service-related initiatives were completed. The system's website received a major overhaul, in an effort to make it more user-friendly and to ensure that employees and retirees have access to relevant and understandable information. In addition, retirement training and outreach for our active police officers was expanded, again in an effort to ensure that they have all the information they need to plan for their retirement.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to The Fairfax County Police Officers Retirement System for its comprehensive annual financial report for the fiscal year ended June 30, 2015. This was the sixth consecutive year that the System has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Fairfax County Retirement Systems received the Public Pension Standards Award for the fiscal year ended June 30, 2016, from the Public Pension Coordinating Council (PPCC), in recognition of meeting the professional standards for plan funding as set forth in the Public Pensions Standards. The PPCC is a confederation of the National Association of the State Retirement Administrators (NASRA), the National Conference on Public Employee Retirement Systems (NCPERS), and the National Council on Teacher Retirement (NCTR).

Other Information

Independent Audit and Actuarial Certifications

Cherry Bekaert LLP performed an annual audit of the financial statements of the System to obtain reasonable assurance about whether the financial statements are free from material misstatements, whether due to fraud or error. Additionally, Cheiron performed an annual actuarial valuation to assess the plan's ability to meet future obligations. The independent auditors' report and certification from the actuary are included in this report.

Acknowledgements

The annual report of the Police Officers Retirement System was prepared by the System's staff under the leadership of the Board of Trustees, whom I have the privilege to serve. I must also acknowledge the entire Retirement

Introductory Section

Systems' team for their tireless work throughout the year to ensure that we continue to provide the best-possible service to and stewardship for the employees, retirees, and citizens of Fairfax County.

This report is intended to provide complete and reliable information for determining the financial status of the System. It is being submitted to the Board of Supervisors and other interested parties and is available to the public via the County's website located at <u>www.fairfaxcounty.gov/retirement/</u>.

Report of Independent Auditor

To Board of Supervisors County of Fairfax, Virginia

To the Board of Trustees Fairfax County Police Officers Retirement System

Report on the Financial Statements

We have audited the accompanying financial statements of the Fairfax County Police Officers Retirement System (the "System"), a pension trust fund of the County of Fairfax, Virginia, as of and for the year ended June 30, 2016 and the related notes to the financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly,

we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the System as of June 30, 2016, and the changes in fiduciary net position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages 14-18 and required supplementary information on pages 35-37 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the System's basic financial statements. The introductory section on pages 1-10, the other supplementary information on page 38, the investment section on pages 39-51, the actuarial section on pages 53-58, and the statistical section on pages 59-62 are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The introductory section, schedule of investment and consultant expenses, schedule of administrative expenses, investment section, actuarial section, and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 18, 2016, on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the System's internal control over financial reporting and compliance.

Cherry Bekaert (LP

Tysons Corner, Virginia November 18, 2016

Management's Discussion and Analysis (Unaudited)

This section presents management's discussion and analysis of the Fairfax County Police Officers Retirement System's ("System" or "Plan") financial performance and provides an overview of the financial activities for the fiscal year ended June 30, 2016. The information in this section should be reviewed in conjunction with the Letter of Transmittal located in the Introductory Section.

Overview of Financial Statements and Accompanying Information

The financial presentation is composed of four parts: (1) the financial statement; (2) notes to the financial statements; (3) required supplementary information and (4) other supplementary information. Below is the summary of the information provided in each of these sections.

Financial Statements. The System presents the Statement of Fiduciary Net Position as of June 30, 2016 and Statement of Changes in Fiduciary Net Position for the year ended June 30, 2016. The Statement of Fiduciary Net Position provides a snapshot of the financial position. It reports the assets, liabilities and resulting net position restricted for pension benefits. The Statement of Changes in Fiduciary Net Position presents the Plan's transactions under the categories of Additions and Deductions. Additions include contributions from the County and by participating employees, net appreciation in the fair value of investments, dividend and interest income. Investment income is reduced by investment-related expenses such as asset management fees, custody charges and consulting fees. Deductions include outlays for monthly pension benefits, refunds of contributions and fees paid for professional services and administrative expenses.

Notes to Financial Statements. The Notes to Financial Statements are an integral part of the financial statements and include additional information and schedules to provide a better understanding of the financial statements. The Notes to Financial Statements include detailed information that are not readily evident in the financial statements such as the accounting policies, plan membership and benefits, and summary disclosures. Specifically:

- Note 1 Describes significant accounting policies.
- Note 2 Provides a description of the System, the funding policy, and member contributions and benefits.

- Note 3 Describes investments and disclosures on fair value hierarchy, interest rate, credit quality, foreign currency risk, derivatives disclosures, and security lending.
- Note 4 Describes the net pension liability, actuarial method and assumptions.
- Note 5 Explains the System's tax status.

Required Supplementary Information. The Required Supplementary Information includes the Schedule of Changes in Net Pension Liability and Related Ratios, Schedule of Net Pension Liability, Schedule of Employer Contributions and Schedule of Money-Weighted Rate of Return. These schedules will be presented over 10 years as information becomes available. A Summary of Significant Changes to the Pension System is also included.

Other Supplementary Information. This section includes the Schedule of Administrative Expenses and the Schedule of Investment and Consultant Expenses. The Required Supplementary Information and Additional Supplementary notes are immediately following the Notes to the Financial Statements.

Financial Highlights

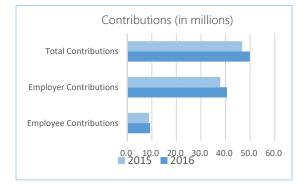

The net position restricted for pension benefits as of June 30, 2016, and June 30, 2015, were \$1,270.4 million and \$1,280.9 million, respectively. The net position representing assets available to pay for current and future member pension benefits, decreased by \$10.5 million or 0.8 percent.

Total additions to net position decreased by 31.3 percent from \$88.4, million in 2015 to \$60.7 million in 2016 primarily due to lower, albeit positive, investment performance this year versus 2015.

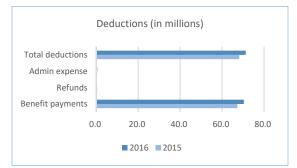

Net investment income decreased 74.2 percent from \$41.5 million in 2015 to \$10.7 million in 2016. The net money-weighted rate of return on investments on a fair value basis was approximately 0.9 percent in fiscal year 2016, and has decreased from 3.4 percent in fiscal year 2015.

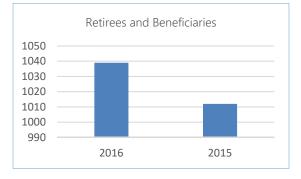

Management's Discussion and Analysis (continued)

Employer and employee contributions received totaled \$49.9 million, an increase of 6.6 percent or \$3.1 million compared to 2015 received contributions of \$46.8 million. The total employer contributions increased from \$37.9 million in fiscal year 2015 to \$40.6 million in fiscal year 2016.

Total deductions from fiduciary net position increased by \$3.1 million from \$68.2 million in 2015 to \$71.3 million in 2016. Member retirement benefit payments of \$70.4 million in 2016 make up the majority of total deduction and increased by \$3.1 million or 4.6 percent from \$67.3 million in 2015. The number of retired members and beneficiaries receiving a benefit payment increased 2.7 percent from 1,012 to 1,039 payees as of June 30, 2016.

The net pension liability as calculated per GASB 67 as of June 30, 2016, and June 30, 2015, were \$290.1 million and \$230.0 million, respectively. The net position as a percentage of total pension liability as of June 30, 2016, and June 30, 2015, were 81.4 percent and 84.8 percent, respectively. The net pension liability as a percentage of covered payroll has increased from 223.6 percent in 2015 to 271.1 percent in fiscal year 2016. The covered employee payroll increased from \$102.8 million in 2015 to \$107.0 million in 2016.

Administrative expenses have remained stable at 0.04 percent of the value of net position for fiscal year 2016.

| | 2016 | 2015 |
|---------------------------------------|---------|---------|
| Net Pension Liability (in million) | \$290.1 | \$230.0 |
| Net Position as Percentage of TPL | 81.4% | 84.8% |
| Covered Employee Payroll (in million) | \$107.0 | \$102.8 |
| New Pension Liability as Percentage | 271.1% | 223.6% |

Financial Analysis

Plan Net Position. When viewed over time, increases or decreases in plan net position can be used to measure the financial condition of a pension plan. As of June 30, 2016, The Police Officers Retirement System held a net position of \$1,270.4 million restricted for pension benefits. Total assets as of June 30, 2016, were \$1,288.7 million, representing a decrease of \$12.6 million, or 1.0 percent over the previous fiscal year. The main component of the decrease was due to deductions exceeding contributions that led to a decline in total cash and investment of \$1,279.5 million in fiscal year 2015 as compared to \$1,268.1 million in fiscal year 2016.

For fiscal year 2016, the net position of the Police Officers Retirement System decreased 0.8 percent resulting in a total net position value of \$1,270.4 million, reflecting a decrease of \$10.5 million over fiscal year 2015. The falling-off in net position was primarily due to deductions exceeding contributions, the decrease of securities lending activity by nearly 22.0 percent and a decrease in investment gains from \$41.5 million in 2015 to \$10.7 million in 2016.

The table in the following page details the Police Retirement System's net position for the current and prior year.

Management's Discussion and Analysis

(continued)

| Summary Statement of Fiduciary Net Position | | | | |
|---|------------------------|------------------------|-----------------------|---------------------------------------|
| Assets | <u>2016</u> | <u>2015</u> | Difference | <u>Percentage of</u> <u>Change</u> |
| Total cash and investments | \$1,268,051,495 | \$1,279,501,163 | (\$11,449,668) | -0.9% |
| Cash collateral, securities lending | 12,294,528 | 15,634,903 | (3,340,375) | -21.4% |
| Capital assets, net | 272 | 544 | (272) | -50.0% |
| Total receivables | <u>8,365,851</u> | <u>6,143,332</u> | <u>2,222,519</u> | 36.2% |
| Total assets | 1,288,712,146 | 1,301,279,942 | (12,567,796) | -1.0% |
| Liabilities | | | | |
| Purchase of investments | (3,857,400) | (2,789,710) | (1,067,690) | 38.3% |
| Securities lending collateral | (12,294,528) | (15,634,903) | 3,340,375 | -21.4% |
| Accounts payables and others | <u>(2,170,505)</u> | <u>(1,940,239)</u> | <u>(230,266)</u> | 11.9% |
| Total liabilities | <u>(18,322,433)</u> | <u>(20,364,852)</u> | <u>2,042,419</u> | -10.0% |
| Net position restricted for pensions | <u>\$1,270,389,713</u> | <u>\$1,280,915,090</u> | <u>(\$10,525,375)</u> | <u>-0.8%</u> |

Net Position for Current and Prior Fiscal Year

| Fiscal Year | Ending Balances (millions) | Net change in dollars (millions) | Net Change in Percent |
|-------------|----------------------------|----------------------------------|-----------------------|
| 2016 | \$1,270.4 | (10.5) | (0.8) |
| 2015 | 1,280.9 | 20.2 | 1.6 |

Total liabilities as of June 30, 2016, were \$18.3 million, representing a decrease of \$2.0 million, or 10.0 percent, over the previous year. The downturn in total liabilities is the result of a decreased level of securities lending activity resulting in a decrease in cash collateral received for securities on loan.

Securities lending cash collateral decreased by \$3.3 million or 21.4 percent due to a decrease in activities in the securities lending program. A separate account structure was implemented in fiscal year 2015 to replace a collective investment pool. The separate account now holds a large position in equity repurchase securities.

The actuarial value of the assets as of the last valuation on June 30, 2016, was \$1,333.2 million while actuarial liabilities as of the same period were \$1,560.5 million. For purposes of funding, this resulted in a funding ratio of 85.4 percent. However, for purposes of GASB 67, the Total Pension Liability as of June 30, 2016, was \$1,560.5 million compared to the Plan Fiduciary Net Position of \$1,270.4 million, which results in a funding ratio of 81.4 percent.

| (Dollars in millions) | 2016 | 2015 |
|------------------------------|----------------|----------------|
| Actuarial Accrued Liability | \$1,560.5 | \$1,491.1 |
| Actuarial Value of Assets | <u>1,333.2</u> | <u>1,290.0</u> |
| Unfunded Actuarial Liability | <u>\$227.3</u> | <u>\$201.1</u> |
| Funding Ratio | 85.4% | 86.5% |
| | | |
| Total Pension Liability | \$1,560.5 | \$1,510.9 |
| Plan Fiduciary Net Position | <u>1,270.4</u> | <u>1,280.9</u> |
| Net Pension Liability | <u>\$290,1</u> | <u>\$230.0</u> |
| Funding Ratio | 81.4% | 84.8% |

The Plan's investments are exposed to various risks including interest rate, market and credit risks. These risks may be influenced by changes in economic conditions and market conditions. Therefore, it is reasonable to assume that there will be changes in the values of the investments held in trust, which could materially affect the amounts reported in the financial statements. Detailed information on investment results are in the Investment Section of this report.

| Summary of Additions and Deductions | | | | |
|-------------------------------------|-----------------------|---------------------|-----------------------|---------------------------------------|
| Additions | <u>2016</u> | <u>2015</u> | Difference | <u>Percentage of</u> <u>Change</u> |
| Employer Contributions | \$40,646,884 | \$37,867,181 | \$2,779,703 | 7.3% |
| Plan Member Contribution | 9,324,066 | 8,889,931 | 434,135 | 4.9% |
| Net income from investments | 10,718,655 | 41,545,283 | (30,826,628) | -74.2% |
| Net income from securities lending | <u>45,373</u> | <u>55,870</u> | <u>(10,497)</u> | <u>-18.8%</u> |
| Total Additions | 60,734,978 | 88,358,265 | (27,623,287) | -31.3% |
| Deductions | | | | |
| Benefit payments | 70,352,623 | 67,276,713 | 3,075,910 | 4.6% |
| Refunds | 397,188 | 480,447 | (83,259) | -17.3% |
| Administrative expense | <u>510,544</u> | <u>443,230</u> | <u>67,314</u> | <u>15.2%</u> |
| Total deductions | <u>71,260,355</u> | <u>68,200,390</u> | <u>3,059,965</u> | <u>4.5%</u> |
| Net increase/(decrease) | <u>(\$10,525,377)</u> | <u>\$20,157,875</u> | <u>(\$30,683,252)</u> | <u>-152.2%</u> |

Additions and Deductions. Total additions to the retirement fund consist of contributions from employers and active members and changes in the value of assets. Total additions decreased by \$27.6 million or 31.3 percent in fiscal year 2016 attributed primarily to \$30.8 million, or 74.2 percent, less appreciation in the fair value of the investments. This is clearly a substantial decline compared to the previous year's investment performance due to the unfavorable market environment in fiscal year 2016.

Total contributions for the fiscal year ended June 30, 2016, amounted to \$49.9 million. This was an increase of \$3.1 million when compared with the activity of fiscal year 2015. The employer contributions for fiscal year 2016 increased by 7.1 percent due primarily to an increase in the employer contribution rate from 36.8 percent to 37.9 percent of salary. Employee contributions increased by 4.5 percent due to merit and COLA increase.

The system experienced a nearly 19.0 percent decrease in net income from securities lending as a result of a downturn in lending activities during the year. Albeit positive, investment returns were lower for fiscal year 2016 than 2015 reflecting moderate returns in the capital markets. Net investment income decreased from \$41.5 million in fiscal year 2015 to \$10.7 million in fiscal year 2016, which is consistent with

the decrease in the net money-weighted investment rate of return from 3.4 percent for fiscal year 2015 to 0.9 percent for fiscal year 2016.

Total deductions to the retirement system consist of the payments of benefits to retirees and beneficiaries, the refund of contributions to former members, and the cost of administering the retirement system. The total deductions for fiscal year 2016 were \$71.3 million, an increase of \$3.1 million, or 4.5 percent, over fiscal year 2015. Regular pension benefit payments increased as the number of retirees and beneficiaries receiving benefit payments climbed to 1,039 from 1,012 in fiscal year 2016. Benefit payments also increased due to a cost-of-living increase of 1.0 percent, and higher average benefits for new retirees. Refunds reflected a 17.3 percent decrease due to lower employee turnover or separation in the fiscal year.

| Participant Counts | 2016 | 2015 |
|---------------------------|--------------|--------------|
| Actives | 1,319 | 1,246 |
| Drop | 75 | 81 |
| Terminated vested | 47 | 47 |
| Retiree in payment status | <u>1,039</u> | <u>1,012</u> |
| Total | 2,480 | 2,386 |

Management's Discussion and Analysis

(continued)

An actuarial valuation is performed annually by Cheiron. As of June 30, 2016, the date of the most recent actuarial valuation, the funded ratio of the system was 85.4 percent. This was a decrease of 1.1 percent from the July 1, 2015, valuation funded ratio of 86.5 percent. The combination of liabilities, investment results, and member and employer contributions over the last year led the funding ratio to decrease. Under GASB 67 calculation, using the December 31, 2015, data rolled forward to June 30, 2016, the plan fiduciary net position as a percentage of the total pension liability was 81.4 percent. It decreased from 84.8 percent in fiscal year 2015 primarily as a result of the slower growth in the plan fiduciary net position due to lower investment returns than forecasted.

Contacting the System's Financial Management This financial report is designed to provide our membership, the Board of Trustees and the County's Board of Supervisors with a general overview of the System's financial condition. If you have any questions about this report or need additional information, contact the Fairfax County Retirement Administration Agency, 10680 Main Street, Suite 280, Fairfax, Virginia 22030. This report can also be found on the County's internet site at <u>www.fairfaxcounty.gov/retirement/</u>.

Notes to the Financial Statements

The Fairfax County Police Officers Retirement System is a legally separate single-employer defined benefit pension plan established under the Code of Virginia to provide defined pension benefits to certain Fairfax County, Virginia ("County") police. As such, the System is considered part of the County reporting entity and its financial statements are included in the County's basic financial statements as a pension trust fund.

Note 1. Summary of Significant Accounting Policies

A. Basis of Accounting.

The System's basic financial statements have been prepared under the accrual basis of accounting in accordance with accounting principles applicable to governmental units in the United States of America. Member and employer contributions to the plan are recognized in the period in which the contributions are due pursuant to legal requirements. Benefits and refunds are recognized when due in accordance with the terms of the plan. The cost of administering the plan is paid by the System.

For financial reporting purposes, the System adheres to accounting principles generally accepted in the United States of America. The System apply all applicable pronouncements of the Governmental Accounting Standards Board (GASB).

On February 2015, the Governmental Accounting Standards Board issued its standard on accounting and financial reporting issues related to fair value measurements. GASB no. 72, Fair Value Measurement and Application is applicable primarily to investments made by state and local governments, defines fair valuation and describes how fair value should be measured. This statement requires disclosures to be made about fair value measurements, the level of fair value hierarchy, and valuation techniques. In fiscal year 2016, the System implemented GASB Statement no. 72. Comprehensive footnote disclosures regarding this Statement is found on Note 3.

B. Method Used to Value Investments.

Short-term investments are reported at cost, which approximates fair value. All other investments are reported at fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Assetbacked securities are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Because of the inherent uncertainty in valuing these securities, the fair value may differ from the values that would have been used had a ready market for such securities existed. Accordingly, the realized value received upon the sale of the assets may differ from the fair value. The System records investment purchases and sales as of trade date. These transactions are not finalized until the settlement date, which occurs approximately three business days after the trade date. The amounts of trade receivables and payables are shown as receivables and payables on the Statement of Fiduciary Net Position. Cash received as collateral on securities lending transactions and investments made with such cash are reported as assets along with a related liability for collateral received. The fair values of private investments and direct real estate are lagged by one quarter due to the timing of receipt of private market valuations and information.

C. Equity in County's Pooled Cash and Temporary Investments.

The System maintains cash with the County, which invests cash and allocates interest earned, net of a management fee, on a daily basis to the System based on the System's average daily balance of equity in pooled cash. As of June 30, 2016, the bank balance of the County's public deposits was either insured by the Federal Deposit Insurance Corporation or through the State Treasury Board pursuant to the provisions of the Security for Public Deposit Act. The County's investments are exposed to various risks such as interest rate risk, market and credit risks. Such risks, and the resulting investment security values, may be influenced by changes in economic conditions and market perceptions and expectations. Accordingly, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

Notes to the Financial Statements (continued)

D. Compensated Absences

Employees are granted vacation and sick leave based on their length of service. Unused annual and compensatory leave is payable to employees upon termination based on the employees' current rate of pay, up to certain limits. Sick leave does not vest with the employees; however, it is converted to years of service upon retirement. In addition, employees may accrue compensatory leave for hours worked in excess of their scheduled hours. Compensatory leave in excess of 240 hours is forfeited at the end of the calendar year.

| Compensated Absences | |
|---------------------------|----------|
| FY 2016 Beginning Balance | \$40,439 |
| Leave Earned | 25,448 |
| Leave Used | 26,354 |
| FY 2016 Ending Balance | 39,533 |
| Current | 23,582 |

Note 2. Summary of Plan Provisions

A. Plan Description.

The System is a single-employer defined benefit pension plan. Benefit provisions are established and may be amended by County ordinance. All benefits vest at five years of service. The general provisions of the Police Officers Retirement System are as follows:

Membership:

The plan covers County police officers who are not covered by other plans of the County or the Virginia Retirement System. Members sworn before January 1, 2013, are members of Plan A. Members sworn on or after January 1, 2013, are members of Plan B.

Contribution Rate:

The member contribution rate is set by the County Ordinance and is currently 8.65 percent of base salary. The County contribution rate is set by the actuarial process and was 37.98 percent for fiscal year 2016. Police Officers do not participate in Social Security.

Benefit:

The benefit is 2.8 percent of average final compensation (highest consecutive three years) multiplied by creditable service including sick leave; and it is then increased by 3.0 percent. Plan B

members have a cap of 2,080 hours of sick leave that will count towards retirement service credit.

Benefit Limit:

The benefit is limited to the maximum amounts for qualified plans as set forth in Section 415 of the Internal Revenue Code. A separate nonqualified benefit restoration plan has been established for the payment of any benefit formula amount in excess of the Section 415 limit.

Normal Retirement:

To be eligible for normal retirement, an individual must meet the following criteria: (a) if employed before July 1, 1981; attained the age of 55 or completed 20 years of service, or (b) if employed on or after July 1, 1981; attained the age of 55 or completed 25 years of service. The normal retirement benefit is calculated using average final compensation (i.e., the highest consecutive three years) and years (or partial years) of service at date of termination. The plan provides that unused sick leave credit may be used in the calculation of average final compensation by projecting the final salary during the unused sick leave period. Those sworn on or after January 1, 2013, may not use more than 2,080 hours of accrued sick leave toward service credit for retirement or Deferred Retirement Option program (DROP) entry. Unused sick leave is also used to increase years of service for calculating benefits and determining retirement eligibility.

Deferred Retirement Option Program (DROP):

Those eligible for normal retirement may enter DROP for a period of up to three years. While participating in DROP, the member continues to work and receive a salary. In lieu of continuing to earn service credit, DROP participants accumulate a lump sum, including interest, payable at retirement. Plan B members who enter DROP may use a maximum of 2,080 hours of sick leave towards retirement service credit.

Early Retirement:

A member is eligible for early retirement upon attaining at least 20 years of creditable service.

Deferred Vested Retirement:

Deferred vested retirement is available for vested members (vesting is at 5 years of service) who leave their contributions in the System when they terminate employment. At age 55, these members are entitled

Notes to the Financial Statements (continued)

to their normal retirement benefit based on service with the Police Department.

Service-Connected Disability Retirement:

Service-connected disability retirement is available for members, regardless of their length of service, who become disabled as a result of a job-related illness or injury. Benefits for total disability are 66.67 percent of the salary, reduced by any Workers' Compensation benefits. These benefits continue during the existence of the disability.

Non-Service Connected Disability Retirement:

Non-service connected disability retirement is available for vested members who become disabled due to an injury or illness that is not job-related. Normal retirement benefits are paid.

Death Benefits:

If death occurs prior to retirement: An automatic monthly benefit is payable to the member's spouse and children. This benefit equals \$2,252.59 for the spouse or surviving handicapped child (if there is no spouse), plus each eligible child receives \$901.03 up to a maximum total family benefit of \$4,505.17 (these benefits are indexed to inflation). If the death occurred in the line of duty, the spouse or surviving handicapped child (if there is no spouse) may elect to receive 66.67 percent of the member's regular salary at the time of death in lieu of the automatic benefits. If death occurs after retirement In addition to the automatic benefit detailed above, at the time the member retires, the plan provides for the member to elect survivor benefit options for the Surviving Spouse or a Handicapped Child at 100 percent, 66.67 percent or 50.0 percent of the retiree's benefit.

Cost of Living Benefit:

Annual cost of living adjustments are provided to retirees and beneficiaries and are equal to the lesser of 4.0% or the percentage increase in the Consumer Price Index for the Metropolitan Statistical Area that includes Fairfax County.

<u>Note:</u> Detailed provisions may be found in the Retirement Handbook for Active Employees.

B. Board of Trustees.

Seven members serve on the Fairfax County Police Officers Retirement System. Three of the members are citizens appointed by the Fairfax County Board of Supervisors. Two of the members are elected by Fairfax County Government Employees, and one of the members is elected by retiree representatives. The Director of Finance also serves as an Ex Officio member.

C. Membership.

At June 30, 2016, the date of the latest actuarial valuation, membership in the System consisted of:

| Retirees and beneficiaries receiving benefits | 1,039 |
|--|--------------|
| Terminated plan members entitled to but not yet receiving benefits | 47 |
| Deferred Retirement Option Program (DROP) participants | 75 |
| Active plan members | 1,319 |
| Total | <u>2,480</u> |

D. Deferred Retirement Option Program

Members eligible for normal retirement may elect to enter the DROP. As a DROP member, he or she will continue to work and receive a salary for a maximum period of three years while an amount equal to what could have been received as a retirement benefit is credited to his or her DROP account. The monthly benefit that will be credited to the DROP account is determined by the years of service and Average Final Compensation at the DROP entry date. During the DROP period, the retirement plan accumulates his or her accrued monthly benefit which is payable at the end of the DROP period. The DROP account balance is credited at an annual interest rate of 5%, compounded monthly. At the end of the DROP period, the DROP member must terminate employment with the Fairfax County Government and will begin receiving his or her monthly retirement benefit. Upon DROP exit, the retiree can elect to receive the balance of the DROP account in the form of a lump sum distribution, a rollover to another qualified plan (or IRA), or as addition to the monthly retirement annuity. The DROP balance as of June 30, 2016, was \$7.1 million.

Notes to the Financial Statements (continued)

E. Contributions

The contribution requirements of the System's members are established and may be amended by County ordinances. Member contributions are based on 8.65 percent of compensation for the year ended June 30, 2016. The County is required to contribute at an actuarially determined rate; the rate for the year ended June 30, 2016, was 37.98 percent of annual covered payroll. The decision was made to commit additional funding and a rate of 37.98 percent was adopted for fiscal year 2016. Total contributions for the fiscal year ended June 30, 2016, amounted to \$49.9 million.

F. Deductions

The deductions from the System include the payment of retiree and beneficiary payments, the refund of employee contributions to former members and administrative expenses. The total deductions for the fiscal year ended June 30, 2016, amounted to \$71.3 million.

Note 3. Investments

A. Investment Policy

The authority to establish the System is set forth in Chapter 303 of the Acts of Assembly (law of the Commonwealth of Virginia). Section 26-45.1 of the *Code of Virginia* (Code), and updated by Section 51.1-803 authorizes fiduciaries of the System to purchase investments with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of like character and with the same aims. The Board shall also diversify such investments as to minimize the risk of large losses unless under the circumstances it is clearly prudent not to do so.

The System's Board of Trustees has adopted a Statement of Investment Objectives and Policy which establishes a broad set of investment objectives, guidelines, risk tolerance and performance standards for the assets of the System. The Board of Trustees has the authority to amend the investment policy. The Board recognizes that investing in worldwide capital markets inherently entails the assumption of risk. The Board believes that part of the risk involved in managing the System's assets can be reduced by investing in diversified, lowly-correlated asset classes and employing different philosophies and investment management styles. The Board has selected a longterm strategic asset allocation strategy which provides a high degree of diversification, maintains appropriate asset coverage of plan liabilities, and also optimizes investment return. Investment decisions for these assets are made by the Board of Trustees or investment managers selected by the Board. The Board hires each of its investment advisory firms on the basis of its specific area of expertise as well as its fit with the total risk and return objectives of the Each manager exercises investment System. discretion around specifically mandated quality, benchmark concentration, and performance quidelines, and practices active risk controls in order to achieve the System's investment expectations.

The following was the System's adopted asset allocation policy as of June 30, 2016. Our asset allocation policy commonly exceeds 100% because we monitor the target exposures to both direct investments in asset classes plus notional exposure to asset classes through derivative positions such as Futures held at the portfolio level. We also commonly include notional exposures for select Investment Managers that have a mandate from the Board to provide the System with additional asset class exposure using leverage or derivatives.

| Asset Class | Target Exposure |
|------------------------|-----------------|
| U.S. Equities | 17.0% |
| International Equities | 12.0% |
| Fixed Income | 30.0% |
| Real Estate | 5.0% |
| Alternatives | 37.0% |
| Risk Parity | 30.0% |

B. Concentrations

For the most part, the overall investment policy does not identify a specific level of credit risk, interest rate risk or foreign currency risk. That is addressed at the individual account level. The guideline for "concentration of risk" is system-wide, however. The System does not hold investments (other than U.S. Government and U.S. Government-guaranteed obligations) in any one organization that represent 5.0 percent or more of net position available for benefits. All investments, except for the pooled and mutual

Notes to the Financial Statements (continued)

funds, short-term investment fund and a short-term collateral investment pool are held by an unaffiliated custodian. There is no custodial credit risk since the custodian's records establish the System's interest in the securities and the custodian provides insurance for all custody assets.

The System's fixed income portfolio shall be, on average, comprised of high-quality issues and limits are imposed on investment managers' belowinvestment-grade holdings. Unless otherwise specified, if any security has a split rating, the higher of the two ratings is used for the purposes of meeting minimum quality standards.

C. Rate of Return

For the year ended June 30, 2016, the annual moneyweighted rate of return on pension plan investment, net of pension plan investment expense, was 0.9 percent. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

D. Fair Value Hierarchy

U.S. equities

The System measures and records its investments using fair value hierarchy measurement guidelines established by generally accepted accounting

Total investments measured at the NAV

Total investments measured at Fair Value

principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and give the highest level to unadjusted quoted prices in

Fairfax County Police Officers Retirement System

Notes to the Financial Statements (continued)

active markets for identical assets or liabilities (level 1 measurements) and the lowest level to unobservable inputs (level 3 measurements).

- Level 1 Unadjusted quoted prices for identical instruments in active markets.
- Level 2 Observable inputs other than quoted market prices; and,
- **Level 3** Valuation derived from valuation techniques in which significant inputs are unobservable.

Investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy. In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The tables in the previous page show the fair value leveling of the investments.

Equities and fixed income securities classified in Level 1 are valued using prices quoted in the active markets for those securities. Securities in Level 2 and Level 3 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities' relationships to benchmark quoted prices. Level 3 securities use proprietary information or single source pricing.

Investment Measured at NAV

| U.S. equities | 122,026,679 | | Monthly, Quarterly | 15 to 90 days |
| Total investment measured at NAV | <u>\$852.907.373</u> | \$69.418.061 | | |

Alternative Investment:

Relative Value: This type includes investment in a hedge fund that seeks to harvest risk premium from four return sources that have traditionally shown up as alpha, but as investors and attribution modeling have become more sophisticated, have become increasingly characterized as alternative or "style" premiums such as: Value - Tendency for relatively cheap assets to outperform relatively expensive ones; Momentum - Tendency for recent relative performance to continue in the near future; Carry -Tendency for higher-yielding assets to provide higher returns than lower; Defensive - Tendency for lowerrisk, high-quality assets to generate higher returns. They implement long and short relative value strategies to capture these structural returns across multiple asset classes including: equity sectors, equity indices, fixed income, currency, and commodities. The fair values of each of this hedge fund has been determined using the NAV per share of the investments.

Multi-strategy: This type includes two hedge funds. The first one uses quantitative and qualitative tools to optimize return per unit of volatility. The fair values of each of this hedge fund has been determined using the NAV per share of the investments. The fund has quarterly liquidity and 33 day notice period for redemptions. The second one focuses on acquiring minority equity stakes in institutionalized hedge fund firms with assets under management in excess of \$1.0 billion.

Event Driven: This type includes investment in a hedge fund focuses on global long/short credit and event driven positions. The fair values of the investments in this type have been determined using NAV per share (or its equivalent) of the investments. The fund has quarterly liquidity and 65 day notice period for redemptions.

Global Macro: This type includes two hedge funds. The first one has 100 active ideas across fixed income,

Notes to the Financial Statements (continued)

currencies, equities and commodities. The process is equally driven by analysis of the macro environment, flows of capital, and the expected reaction to changes in interest rates and other drivers. The fair values of the investments in this type have been determined using NAV per share (or its equivalent) of the investments. The second one focuses on China, investing in equity, credit, interest rate, currency and commodity products. The fund has monthly liquidity and 30 day notice period for redemptions.

Trend Following: This type includes one hedge fund that is a Commodity Trading Advisor (CTA) that analyzes market prices to determine trends then uses tactical asset allocation to capture and ride market trends. The Fund is a diversified portfolio with exposure to currencies, commodities, bonds and short interest rates, and equity indices at various times. These exposures are typically achieved through the use of derivatives which allows quick response because of the high liquidly in the derivative markets. The fair values of the investments in this type have been determined using NAV per share (or its equivalent) of the investments.

Fixed Income:

This type includes three funds and two private debt funds. The first one is a directional opportunistic global credit fund investing in public and private credit across commercial real estate, residential real estate, corporates, other. The fund invests principally in performing, stressed or distressed securities and loans of any type and within any sector across the global fixed income markets. The second one focuses on distressed residential and commercial real estate related debt and equity securities. The fund seeks to take advantage of global financial institutions which are deleveraging to comply with widespread regulatory reform and continuing to make noneconomic asset sales decisions. The third one invests in U.S. convertible bonds and the fund has monthly liquidity and 10 day notice period for redemptions. The two private debt funds are middle market direct lending funds that negotiate senior secured loans to borrowers that are too small to attract the attention of conventional banks and lenders. These investments cannot be redeemed. Instead, the nature of the

investments in these private debt funds are that distributions are received through the liquidation of underlying assets of the funds over four to five years. Loan payments are also distributed on a quarterly basis. The loans are held at book value unless a payment default has occurred.

International Equities:

This type includes two funds. The first one is an international small cap fund that uses a quantitative approach. In addition to traditional value measures such as price/earnings and price/book ratios, the firm also considers growth-related factors, such as price momentum and trends in analysts' earnings estimates, to target undervalued companies that have strong prospects for future outperformance. The fund has daily liquidity. The second one seeks long term capital appreciation by investing primarily in companies located in emerging market countries and opportunistically, in frontier market countries. The portfolio typically holds 30-50 companies within global emerging markets. Country and sector exposures are primarily a by-product of individual stock selection. The fund has monthly liquidity and 15 day notice period for redemptions.

Risk Parity:

This type includes three funds that invests across asset classes using a risk balanced approach in their asset allocation of the Funds with the intent to balance risk across all four combinations of Rising and Falling Growth and Inflation. The main goal is to construct a portfolio that achieves the best risk adjusted return at a 10% expected volatility by overweighting the lower risk asset classes and balance expected returns in inflationary, deflation, high growth and low growth periods. This is achieved through the use of derivatives and liquid long positions across multiple asset classes. The fair values of the investments in this type have been determined using NAV per share (or its equivalent) of the investments.

U.S. Equities:

This type includes three hedge funds. The first one is a bundled portable alpha mandate which uses futures on the S&P 500 Index and ports it to a fundamental global macro/fixed income fund. The fund has

Notes to the Financial Statements (continued)

exposure to interest rates, Foreign exchange, equity indices and commodities. However, the majority of its exposure is generally to interest rates. It differs from the average macro fund in that it will also have exposure (albeit very limited) to credit (both IG & HY), mortgages (Residential Mortgage Backed Securities & Commercial Mortgage Backed Securities) and Asset-Backed Securities. The second one is a U.S. small cap deep value long/short equity fund. The team looks for companies with management or capital structure issues. They identify undervalued companies and then perform a fundamental value analysis to find catalysts that may spark change in the company. The Fund will then, on its own or together with other members of a group, acquire a controlling interest in the company and then force management to enact the changes they feel are necessary for a turnaround. The fair

values of each of these hedge funds has been determined using the NAV per share of the investments. The fund has guarterly liquidity and 90 day notice period for redemptions. The third one is based on the fundamental concepts of value (buying securities that are cheap and selling those that are expensive) and momentum (buying securities that are getting better and selling those that are getting worse) investing. The fund applies both concepts through the use of numerous proprietary indicators across many sectors, while generally giving more weight to value than momentum. This is a long/short strategy that maintains a net 100% invested position by investing 130% of portfolio assets in long positions and 30% in short positions. The fund has monthly liquidity and 15 day notice period for redemptions

| Type of Investment | Fair Value | Ratings | Percent o Fixed |

| *Short-term investment | | | |

E. The System's investment quality ratings at June 30, 2016, were as follows:

As of June 30, 2016, the fixed income portfolio consisted of 51.6 percent invested in investment grade securities, 35.9 percent invested in securities rated below-investment-grade and 12.5 percent invested in unrated securities.

The Barclays Capital Aggregate Bond Index (BCAG) is the standard benchmark against which the industry and the System's Board measures its fixed income portfolio performance and volatility. The System's fixed income managers have discretion, within circumscribed limits, to extend the duration of their portfolios beyond that of the BCAG if they forecast falling interest rates (and thus higher bond prices). Conversely, if managers anticipate that the general level of interest rates will rise, they have the ability to shorten the duration of their portfolio and thus reduce the portfolio's sensitivity to rising rates.

Notes to the Financial Statements (continued)

| Investment Type | Fair Value | Option- Adjusted Duration (yrs) | Percentage of Fixed Income |
|---------------------------|----------------------|--|-------------------------------|
| US Government | \$53,072,184 | 6.0 | 26.7% |
| Corporate and other bonds | 70,178,147 | 5.4 | 35.3% |
| Asset-backed securities | <u>75,710,401</u> | <u>3.7</u> | <u>38.0%</u> |

| | <u>\$55,523,233</u> | | |

F. The System's investments' sensitivity to interest rates at June 30, 2016, were as follows:

As of June 30, 2016, the System's overall fixed income portfolio option-adjusted duration was 4.9 years. BCAG's established option-adjusted duration was 5.47 years.

G. Short term investments of \$55.5. million includes a position of \$53.7 million of uninvested cash held by our investment managers and cash held by the system in an enhanced short term investment fund managed by our custodian.

H. Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of the investment. The System's investments at June 30, 2016, held in currencies other than U.S. dollars were as follows:

| International Securities | Short-Term Investments and Other | Convertible and Fixed Income | Equity | Total |
|--------------------------|--|---------------------------------|---------------------|---------------------|
| Australian Dollar | \$1 | \$233,040 | \$7,064,695 | \$7,297,736 |

Notes to the Financial Statements (continued)

I. Derivative Financial Instruments.

In accordance with the Board's investment policies, the System regularly invests in derivative financial instruments in the normal course of its investing activities to enhance return on investment and manage exposure to certain risks within the System. The System also enters into derivative transactions to gain exposure to currencies and markets where derivatives are the most cost-effective instrument. Derivative instruments are financial contracts whose values depend on the values of one or more underlying assets, reference rates or financial indices. During fiscal year 2016, the System had exposure to various derivatives including asset-backed securities, collateralized mortgage obligations, exchange-traded futures contracts, forward currency contracts, options, swaps, and floating rate securities. Some securities, such as structured notes, can have derivative-like characteristics where the return may be linked to one or more indexes. Others such as asset-backed securities, like collateralized mortgage obligations (CMOs), are sensitive to changes in interest rates and pre-payments. It should also be noted that the System has exposure to derivatives indirectly through its ownership interests in certain hedge funds, mutual funds and commingled funds which may use, hold or write derivative financial instruments.

Derivative investments may involve, to varying degrees, elements of credit and market risk in excess of amounts recognized on the financial statements. Market risk results from fluctuations in interest rates and currency rates. The credit risk of these investments is associated with the creditworthiness of the related parties to the contracts. The System could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. Holders of futures contracts look to the exchange for performance under the contract and not to the other party holding the offsetting futures position. Accordingly, the amount at risk due to nonperformance of counterparties to futures contracts is minimal. For counterparties involving over the counter derivatives, the Board seeks to control this risk through counterparty credit evaluations, counterparty credit limits, and exposure monitoring procedures conducted by investment managers and staff. To address counterparty risk, the System instructs our investment managers who use swaps, forwards, and options to only enter into contracts with counterparties rated at investment grade of BBB or

better by at least one nationally recognized rating agency.

At June 30, 2016, the System held the following three types of derivative financial instruments: futures, swaps and currency forwards. Futures, swaps and currency forwards contracts provide the System with the opportunity to build passive benchmark positions, manage portfolio durations in relation to various benchmarks, adjust portfolio yield curve exposure, enhance returns, and gain market exposure to various indices in a more efficient way and at lower transaction costs. Credit risks depend on whether the contracts are exchange-traded or exercised over-the-counter. Market risks arise from adverse changes in market prices, interest rates and foreign exchange rates.

Investment managers are prohibited from purchasing securities on margin or using leverage unless specifically permitted within the investment manager's guidelines. Derivative instruments covered under the scope GASB 53 are reported at fair value. The change in fair value of derivative instruments that are used for investment purposes are reported within the investment revenue classification. Gains and losses on derivative securities are determined based upon fair values as determined by our custodian and recorded in the Statement of Changes in Fiduciary Net Position.

<u>Futures</u>

Futures contracts are contracts to deliver or receive securities at a specified future date and at a specified price or yield. Futures contracts are traded on organized exchanges (exchange-traded) and typically require an initial margin (collateral) in the form of cash or marketable securities. The net change in the futures contract value is settled daily, in cash, with the exchanges. The net gains or losses resulting from the daily settlements are included in the System's financial statements. Holders of futures contracts look to the exchange for performance under the contract and not to the entity holding the offsetting futures position. Accordingly, the amount at risk posed by nonperformance of counterparties to futures contracts is minimal.

Notes to the Financial Statements (continued)

The notional value of the System's investment in futures contracts at June 30, 2016, is as follows:

| Types of Futures Cash & cash equiv futures- | Base Exposure | Notational Cost |
|---|---------------------|---------------------|
| Short | (\$54,170,391) | (\$55,073,654) |
| Equity-Long Fixed income securities- | 100,225,090 | 100,939,952 |
| Long | 52,808,242 | <u>51,596,739</u> |
| Total | <u>\$98,862,941</u> | <u>\$97,463,037</u> |

<u>Swaps.</u>

The System enters into several types of swap contracts, in which two counterparties agree to exchange one stream of payments for another over some agreed to period of time. Swaps are used to manage risk and enhance returns. All counterparties are rated A or better. The following is the information on the System's swap contracts outstanding at June 30, 2016:

| | Base Exposure | Fair Value |
|------------------------------|---------------|---------------|
| Fixed Income Swaps | | |
| Cleared credit default swaps | \$251,690 | \$244,917 |

Currency Forwards.

Currency forwards represent foreign exchange contracts and are used to effect settlements and to protect the base currency value of portfolio assets denominated in foreign currencies against fluctuations in the exchange rates of those currencies or to gain exposure to the change in fair value of a specific currency. A forward foreign currency exchange contract is a commitment to purchase or sell a foreign currency at a future date and at a negotiated price. The credit risk of currency contracts that are exchange-traded lies with the clearinghouse of the exchange where the contracts are traded. The credit risk of currency contracts traded over-the counter lies with the counterparty, and exposure usually is equal to the unrealized profit on in-the money contracts. All counterparties are rated A or better. The market risk in foreign currency contracts is related to adverse movements in currency exchange rates.

| Euro Currency | nrealized ain/(Loss) |
|--|-------------------------|
| | |
| Unit (\$656,000) (\$730,726) | \$9,187 |
| Japanese Yen (125,811,000) (1,229,654) | (53,548) |
| Pound Sterling (104,000) (139,062) | 12,107 |
| <u>(</u> | (\$32,254) |

Notes to the Financial Statements

(continued)

J. Securities Lending. The Board of Trustees' policies permit the System to lend its securities to brokerdealers and other entities (borrowers) for collateral that will be returned for the same securities in the future. The System's custodian is the agent in lending the plan's domestic securities for collateral of 102.0 percent and international securities of 105.0 percent. The custodian receives cash or securities as collateral from the borrower. All securities loans can be terminated on demand by either the System or the borrower. Securities received as collateral are not reported as assets and liabilities on balance sheets since the Retirement Administration Agency does not have the ability to pledge or sell the collateral securities absent borrower default.

The System did not impose any restrictions during fiscal year 2016 on the amounts of loans the lending agent made on its behalf. At year end, the System had no credit risk exposure to borrowers because the amounts the System owed the borrowers exceeded the amounts the borrowers owed the System. The custodian provides full indemnification to the System for any losses that might occur in the program due to the failure of a broker/dealer to return a borrowed security or failure to pay the System income earned on the securities while on loan. Cash collateral is invested in a separate account with the lending agent which includes a larger allocation than last year to equity repurchase securities. At June 30, 2016, cash collateral had a weighted-average maturity of one day. The maturities of the resulting investments generally match the maturities of the securities lending arrangements. While the System bears no credit risk from the failure of a borrower to return a borrowed security, it does bear risk from investing the collateral.

The following represents the balances relating to the securities lending transactions at June 30, 2016:

| | Underlying | Cash Collateral | Securities Collateral |
|---|---------------------|---------------------|-----------------------|
| Securities Lent Lent for Cash Collateral | Securities | Investment Value | Investment Value |
| Corporate and other bonds | \$120,090 | \$123,350 | |
| Common and preferred stocks | 11,696,291 | 12,171,178 | |
| Lent for Securities Collateral | | | |
| Common and preferred stocks | <u>14,432,961</u> | | <u>\$15,946,222</u> |
| Total Securities lent | <u>\$26,249,342</u> | <u>\$12,294,528</u> | <u>\$15,946,222</u> |

Notes to the Financial Statements (continued)

Note 4. Net Pension Liability, Actuarial Method and Assumptions

A. Net Pension Liability

The components of the net pension liability at June 30, 2016, were as follows:

| Total pension liability | \$1,560,517,712 |
|--|-----------------|
| Plan fiduciary net position | 1,270,389,713 |
| Net pension liability | \$290,127,999 |
| Plan fiduciary net position as a percentage of the total pension liability | 81.4% |

B. Actuarial Methods and Assumptions. The Total Pension Liability was determined by an actuarial valuation as of June 30, 2016, using the following actuarial assumptions, applied to all periods included in the measurement.

| Discount rate, net of plan | 7.25% |
|--|---------------|
| Inflation | 2.75% |
| Salary increases, including inflation | 2.75% + merit |
| Investment rate of return, net of plan investment expenses | 7.25% |
| Municipal bond rate | N/A |
| Projected period of unfunded benefit payments | None |

The actuarial assumptions used have been recommended by the actuary and adopted by the System's Board of Trustees based on the most recent review of the System's experience presented at a Board meeting on April 13, 2016. In the Schedule of Changes in Net Pension Liability, the beginning of year amount differs from the actuarial accrued liability listed in the July 1, 2015, actuarial valuation report because GASB 67 disclosures used a roll-forward methodology and did not include the liability gain that was measured in the 2015 valuation.

The rate of employer contributions to the System is composed of normal cost, amortization of the unfunded actuarial accrued liability and an allowance for administrative expenses. The normal cost is a level percent of payroll cost which, along with the member contributions, will pay for projected benefits at retirement for each plan participant. The actuarial accrued liability is that portion of the present value of projected benefits that will not be paid by future normal employer costs or member contributions. The difference between this liability and the funds accumulated as of the same date is the unfunded actuarial accrued liability. The allowance for administrative costs is based upon the System's actual administrative expenses.

The County is required to contribute at an actuarially determined rate; the rate for the year ended June 30, 2016, was 31.37 percent of annual covered payroll. The decision was made to commit additional funding and a rate of 37.98 percent was adopted for fiscal year 2016. Since the PORS's adjusted funded ratio (the ratio of the sum of the actuarial value of assets and commitments already made to fund changes to the actuarial accrued liability) has fallen below 90.0 percent, the contribution rate includes a margin to amortize this shortfall back to the 90.0 percent level. In fiscal year 2011 the target was increased to a 91.0 percent level, with the 2015 fiscal year contribution it was increased to 93.0 percent, and with the 2016 fiscal year contribution it was increased again to 95.0 percent. The intent of the County is to continue increasing the amortization target until full actuarial funding has been restored. The goal is to reach an amortization to 100 percent in contributions at or before fiscal year 2020.

Mortality rates with adjustments for mortality improvements were based on 110% and 100% of the RP-2014 Healthy Annuitant Mortality Table for males and females respectively, projected using the RPEC-2015 model, with an ultimate rate of 0.75% for ages 20-85 grading down to an ultimate rate of 0% for ages 115-120 and convergence to the ultimate rate in the year 2015. 20% of deaths are assumed to be service-connected.

The actuarial assumptions used in the June 30, 2016, valuation were based on the results of an actuarial experience study for the period July 1, 2010 to June 30, 2015.

Notes to the Financial Statements (continued)

C. Long Term Expected Rate of Return.

The long term expected rate of return on pension plan investments was determined using a buildingblock method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Best estimates of arithmetic real rates of return for each major asset class included in the System's target asset allocation as of June 30, 2016, are summarized below.

| Asset Class | Long Term Expected Real Rate of Return |
|------------------------|---|
| U.S. Equities | 4.65% |
| International Equities | 4.50% |
| Fixed Income | 2.40% |
| High Yield | 4.20% |
| Real Estate | 4.65% |
| Commodity | 4.65% |
| Risk Parity | 6.00% |
| Absolute Return | 9.85% |

D. Discount Rate.

The discount rate used to measure the total pension liability was 7.25 percent. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that County contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

In making this determination, we assumed the outflows would equal the anticipated benefit payments from the 2015 actuarial valuation. The administrative expenses attributable to current actives were assumed to equal 0.30 percent of covered payroll. The inflows to the plan were

assumed to continue at the average aggregate rate for the 2015 active population of 8.65 percent of payroll and County contributions were projected at 37.98 percent for fiscal year 2016, 38.98 percent for fiscal year 2017, with continued increases to 42.42% to be contributed until 2032. After that time the County contribution was assumed to drop to the normal cost plus expenses (21.87 percent) since the unfunded actuarial liability is expected to be fully funded by that time.

E. Sensitivity of the Net Pension Liability to Changes in Discount Rate.

The following presents the net pension liability of the County, calculated using the discount rate of 7.25 percent, as well as what the County's net pension liability would be if it were calculated using a discount rate that is 1-percentage-pont lower (6.25 percent) or 1-percentage-higher (8.25 percent) than the current rate.

| Sensitivity of Net Pension Liability | | | |
|---|---------------|---------------|--------------|
| | 1% Decrease | Discount Rate | 1% Increase |
| | 6.25% | 7.25% | 8.25% |
| Net Pension Liability | \$495,152,354 | \$290,127,999 | \$99,840,413 |
| Plan Fiduciary Net Position as a Percentage of the Total Pension Liability | 72.0% | 81.4% | 92.7% |

Note 5. Income Taxes

The Internal Revenue Service issued the System a determination letter which stated that the System and its underlying trust qualify under the applicable provisions of the Internal Revenue Code and therefore are exempt from federal income taxes.

Required Supplementary Information (Unaudited)

| Schedule of Changes in the Net Pension Liability and Related Ratios | | | | | |
|---|------------------------|------------------------|------------------------|--|--|
| | Year Ended June 30 | | | | |
| | 2016 | 2015 | 2014 | | |

<u>County of Fairfax, Virginia</u>

To protect and enrich the quality of life for the people, neighborhoods and diverse communities of Fairfax County

November 14, 2016

Dear Members of the Board of Trustees:

U.S. equity markets provided mixed returns in the fiscal year 2016 as episodes of heightened market volatility interrupted an otherwise positive market environment. Domestic bond markets proved attractive during these periods of disruption providing a desired safe haven for investors and delivering strong returns. On the international side, non-U.S. developed equities edged lower as U.S. dollar strength cut into returns and political turmoil led by the U.K.'s decision to leave the EU sent a wave of volatility through the market. Despite easy policy from central banks in Europe and Japan, continuing growth concerns also contributed to negative equity returns.

The U.S. economy appeared to exhibit continued resilience in the face of global market conditions and geo-political events. More consistently positive economic news for the U.S. helped push domestic equity prices higher. Notwithstanding, yields on most fixed income securities narrowed on greater demand for safe haven assets, even as the economy grew at a moderately-healthy pace and unemployment receded further. The large-cap domestic equity market, as measured by the S&P 500 Index, capped off the fiscal year with a +4.0% return even as most smaller-cap domestic indices posted losses. The domestic bond market, as measured by the Barclays Aggregate Bond Index, returned +6.0% over the same period. The global equity market, as measured by the MSCI All Country World Index (net), returned -3.7% for the fiscal year, reflecting a blend of the positive results in the U.S. and the negative performance in the non-U.S. developed markets (MSCI EAFE down -10.2% for the trailing year) and emerging markets (MSCI EM down 12.1%).

During the quarter ended September 30, 2015, international equities contracted sharply with developed markets down around 10% and emerging markets losing nearly 18%. Fear of a pending rate hike by the Fed and negative headlines from China and Greece helped fuel the selloff. Greece and Brazil were among the hardest hit emerging economies, trading down 35% and 33%, respectively. Emerging market small-cap stocks continued to outpace their larger-cap peers. Within developed markets, European equities were down 8%, while Japanese stocks lost 10%. At home, equities suffered their worst quarterly loss in four years. The S&P 500 Index declined 6.4% in the third quarter, erasing its gains for the year; the Russell 2000 Index lost 11.9%. Within large-cap stocks, growth bested value, while value stocks lost less in the small-cap space. Overall, energy and healthcare were among the worst performing sectors. Within the U.S., Treasuries and other high-grade assets rallied as lower quality securities sold off amid the market volatility. To this end, the Barclays U.S. Aggregate Bond Index gained 1.2% in the third quarter. Risk premiums widened with U.S. investment-grade corporate spreads increasing 24 basis points to 169 basis points. High-yield bond spreads spiked 160 basis points to 630 basis points with the Barclays U.S. Corporate High Yield Index losing 4.8%.

Fairfax County Retirement Systems10680 Main Street * Suite 280 * Fairfax, VA 22030Phone: 703-279-8200 * 1-800-333-1633 * Fax: 703-273-3185www.fairfaxcounty.gov/retirement/

The Treasury curve flattened over the quarter; the yield on the 30-year Treasury fell 24 basis points to 2.90%, while the yield on the one-year Treasury increased by six basis points to 0.34%. Outside the U.S., developed market bonds rallied as investors shunned risk; the Citigroup WGBI Index rose 1.7% in the third quarter. Meanwhile, emerging market debt faced headwinds. Weakening currencies continue to be the principal drag on emerging market debt. Consequently, debt denominated in local currency declined the most, losing 10.5%, while hard-currency sovereign debt fell 1.7%, according to the JP Morgan EMBI Index. In general, the debt of exporters of oil and commodities underperformed during the quarter. Brazilian debt was also sharply lower, rocked by a ratings downgrade by Standard & Poor's Ratings Services and continued economic weakness.

U.S. equities ended a volatile 2015 on a strong note. Despite a solid fourth quarter, the year saw the lowest gains for the S&P 500 since 2008 and for the Russell 2000 since 2011. Earlier in the guarter, equities rallied amid robust corporate earnings and macroeconomic data. Subsequently, stocks faltered amid plunging oil prices and concerns around the impact of a stronger U.S. dollar as the Fed tightens monetary policy. The consumer discretionary sector led performance in large caps in 2015 while healthcare dominated small caps; energy was the worst performing sector in both. Growth bested value in large and small equities. Meanwhile, developed markets recouped a portion of their third guarter losses, gaining 4.8% in the last guarter. For the calendar year, international equities were down around 0.4%. The energy and materials sectors drove losses, trading down over 16% in 2015; consumer staples and healthcare were the strongest performers, up over 8%. Emerging economies returned 0.7% as the Fed's 25 basis points rate hike—its first since 2006—drove markets lower; healthcare and consumer discretionary sectors gained during the quarter while industrials and staples lagged. For 2015, the materials sector—down over 20%—was a major detractor of performance. Brazil traded off 41% as the real declined sharply amid the country's political and economic problems. At home, the Fed's well telegraphed rate hike drove government yields higher in the fourth guarter, resulting in losses for Treasuries with maturities of less than one year. Within corporate credit, the precipitous selloff in commodityrelated sectors was unrelenting. Consequently, high-yield debt was the worst performer during the guarter and in 2015, losing 2.07% and 4.47%, respectively; in high yield, energy and metals and mining lost nearly 25% last year. Investment-grade credit spreads widened 34 basis points over the course of 2015 to 165 basis points; contributors included global growth concerns, falling commodity prices, and record issuance of \$1.3 trillion which hampered liquidity. Abroad, emerging market debt remained hindered by a strengthening U.S. dollar, causing the local currency index to lose 0.01% compared to returns of 1.25% for the dollar-denominated index. Within developed markets, weakening currencies aided losses of 1.23%, according to the Citigroup WGBI Index.

Concerns around global growth and the precipitous decline in oil prices roiled stocks initially in the first quarter of 2016 but reassuring economic data triggered a dramatic reversal in March. The Standard & Poor's 500 Index posted its best return in March since 2009, putting it back in the black for the year. The S&P 500 ended the guarter with gains of 1.3%, while the Russell 2000 Index was down 1.5%. Returns were generally driven by the beaten down areas of the market, including smaller, lower-guality and commodity-related equities; however, high-guality stocks still lead for the year. Defensive bond-proxy sectors, for instance, telecom and utilities, were the best performers; value outperformed growth. Across the pond, developed markets also sold off earlier in the year and then rebounded following further rate cuts by the European Central Bank and comments from the Federal Reserve on a slowing pace for raising rates that fueled a weaker dollar. Non-U.S. markets lost 3%, according to the MSCI EAFE Index. European banks were hit the hardest during the quarter leading to losses of 9.6% for the financial sector. Energy, a laggard in 2015, was the best performing sector with returns of 4.7%. Japan experienced the worst results, selling off 6.5% in the first guarter. Similarly, emerging markets started the year with a sharp selloff, subsequently reversing course. As a result, emerging markets returned 13% in March—their best month since 2011. For the guarter, emerging markets gained 5.7%, besting other equity markets. Strongest performers included Brazil with gains of 27.4%. Global fixed-income markets staged a dramatic comeback in the second half of the guarter. Global yields were pushed lower with the ECB and Bank of Japan cutting rates deeper into negative territory. Further stimulus from the ECB, a dovish Fed statement and improvements in macroeconomic data bolstered performance. Global investment-grade spreads tightened during the period led by the industrials sector, while global high-yield debt sharply rebounded; at home, high-yield issues gained

3.2%. Given the rebound in commodities, commodity-related sectors led performance. Returns were positive across emerging markets with local sovereign debt markets leading the way as rates fell and currencies appreciated.

Markets witnessed quite a surprise in the second quarter of 2016 as the United Kingdom voted to leave the European Union. Concerns of increased political risk in the U.K. and Europe briefly jolted equity and currency markets across the globe. Risk assets sharply sold off but quickly reversed as market concerns abated. U.S. markets followed suit and ultimately continued their rally as the S&P 500 ended the quarter up 2.5%. Outside the U.S., emerging markets demonstrated resiliency to finish the guarter in positive territory. Developed market equities modestly recovered with the MSCI EAFE down only 1.5%. The Russell 2000 had a strong guarter as 9 out of the 10 economic sectors registered positive returns. From a sector basis, the more defensive sectors led the market higher with energy, telecommunications, utilities and health care. Sectors lagging in the guarter were consumer discretionary, information technology and industrials. Across the developed world, equity markets declined following the U.K.'s decision to leave the EU before rallying in the final days of the quarter. Ireland and Italy led developed markets lower, selling off 9.9% and 9.7%, respectively. In local terms, Japanese equity markets declined nearly 7%, while, for U.S. dollar investors, Japan equities returned a positive 1% as the yen approached a 2 year high against the dollar. The yen has rallied considerably for the year and continues to benefit from its perceived safe-haven status. Similar to the U.S., energy was the top sector in developed markets, returning roughly 11.5% while consumer discretionary stocks were one of the weakest returning -8.2% for the guarter. Within emerging markets, investors looked past the Brexit fears and recognized ongoing positive developments. Latin America was a particular focus, where favorable election results in Peru and further progress in the impeachment process in Brazil led to those markets returning 16.9% and 13.3%, respectively. In contrast, China equity markets continued to waver, trailing the broader benchmark with a return of -1.7%. From a sector perspective, consumer staples stocks performed the best, returning 4.2% for the guarter. The second guarter illustrated the current dichotomy within fixed income: safe-haven assets rallied significantly, while risky assets also outperformed as investors continued to search for yield. Globally, the 10 year German bund broke into negative territory, falling 28 bps to -0.13%. In Japan, 10-year bond yields continued to move lower, settling at -0.22%. At home, the U.S. 10 year Treasury yield compressed 29 bps, nearing its all-time low at 1.49%. The Barclays Aggregate returned 2.2%, while U.S. High Yield returned 5.5% for the quarter. Overall, credit was broadly supported by lower quality sectors. Non-credit risk assets also performed well, as emerging market local debt returned 2.7% in the quarter with a strong rebound in June of 5.9%. For the year, emerging local debt remains one of the best performing risk assets in fixed income, returning over 14%.

Police Officers Retirement System

The Police Officers Retirement System operates a balanced and diversified investment program with disciplined asset re-balancing to achieve strategic long-term goals. This disciplined investment process has been effective in achieving a long-term record of consistent asset growth.

For fiscal year 2016, investments provided a return of 1.1%, gross of fees (0.9%, net of fees). The System's annualized rates of return, gross of fees, were 6.8% (6.6%, net of fees) over the last three years and 5.9%, (5.7%, net of fees), over the last five years, 6.4%, (6.1%, net of fees), over the last ten years. The System's returns ranked in the 44th percentile of The Bank of New York Mellon universe of public plans in 2016, in the 44th percentile for the latest 3-year period, in the 71st percentile for the last 5 years, and in the 11th percentile of public plans for the past 10 years (performance are calculated using time-weighted rate of return).

During the past twelve months, we continue to focus on overall portfolio management, monitoring the financial markets and maintaining a high quality group of investment managers. The Sands Capital Emerging Markets Growth Fund was added to the International Equity manager lineup replacing Acadian Emerging Markets Fund. PIMCO Bonds Plus was removed from the Fixed Income manager lineup. AQR Style Premia, Dyal II, and Emerging Sovereign Group Nexus Fund were added to the Alternative manager lineup.

Sincerely,

Katherine Mohar

Police Officers Retirement System – Allocation of Capital Exposures

Target Asset Allocation

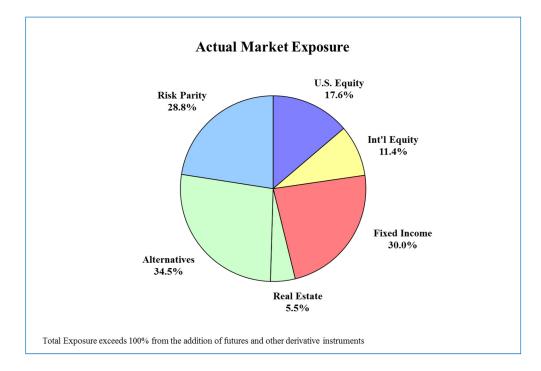

The asset structure shown below represents the Trustees' assessment of their optimal asset allocation as of June 30, 2016. The target asset allocation provides a reasonable expectation that the System's investment objectives can be achieved based on historical relationships of asset class performance.

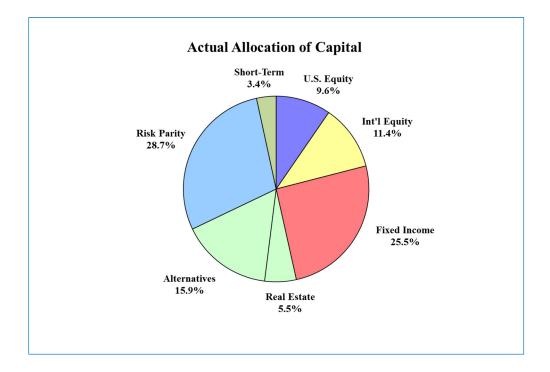

The pie chart below details the target asset mix, consistent with the achievement of the long-term objectives of the System, as of June 30, 2016.

Actual Asset Allocation as of June 30, 2016

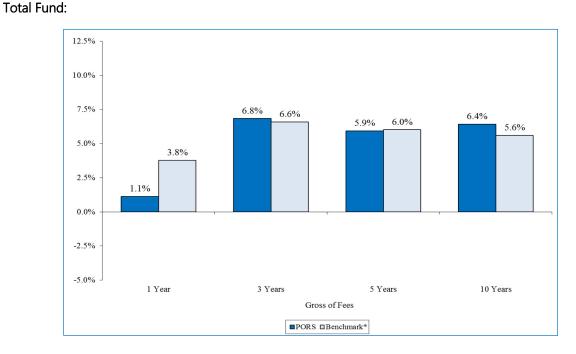

The asset structure of Police Officers Retirement System has historically reflected a proper balance of the System's needs for liquidity, growth of assets, and risk tolerance. The System's investment policy is designed to continue to meet its long-term investment objectives while, at the same time, providing sufficient flexibility to meet short-term funding requirements.

Classic Values, Innovative Advice.

November 1, 2016

Fairfax County Police Officers Retirement System 10680 Main Street, Suite 280 Fairfax, Virginia 22030-3812

Dear Members of the Board:

At your request, we have performed an actuarial valuation of the Fairfax County Police Officers Retirement System as of June 30, 2016. The full results and analysis of that annual valuation will be presented in a full actuarial valuation report. The purpose of this actuarial section is to provide key information from that report and support the disclosure of Total Pension Liability that is presented in the Financial Section of this CAFR. For a more complete analysis, please see the full report.

Funding Objective

The funding objective of the System is to establish contribution rates that will remain level as a percentage of payroll over time. In order to achieve a more stable contribution rate, the County implemented a corridor funding method on July 1, 2002 (based on the July 1, 2001 valuation results). Under this approach, the current contribution rate is based on the normal cost rate and expense rate developed in the current valuation combined with an unfunded actuarial liability rate (UAL rate) based on assumption and plan changes since July 1, 2001 and a 15-year amortization of any amount by which the System's funded ratio is outside the corridor. The County is taking steps to increase the bottom of the corridor from the originally established 90% up to 100% by 2020. The Fiscal Year (FY) 2016 contribution was developed in the 2014 valuation report and was based on a corridor level of 95%.

Assumptions

The actuarial assumptions used in performing the June 30, 2016 valuation were recommended by the actuary and adopted by the Board of Trustees based on our most recent review of the System's experience for the five-year period ending June 30, 2015. The assumptions reflect our understanding of the likely future experience of the System and the assumptions both individually and as a whole represent our best estimate for the future experience of the System. The results of this report are dependent upon future experience conforming to these assumptions. To the extent that future experience deviates from the underlying assumptions, the results would vary accordingly.

Reliance on Others

In preparing our valuation, we relied on information (some oral and some written) supplied by the System. This information includes, but is not limited to, plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standards of Practice No. 23.

Supporting Schedules

As a part of the 2015 actuarial valuation, Cheiron prepared the Analysis of Financial Experience, Schedule of Retirants and Beneficiaries Added to and Removed from the Rolls and Solvency Test provided in this Actuarial Section.

We are also responsible for the disclosures of Net Pension Liability and its components in the Financial Section. The information provided in Note 4 of the Financial Section comes from the Actuarial Valuation as of June 30, 2016.

Compliance with Code of Virginia §51.1-800

Code of Virginia §51.1-800 requires that the benefits provided to a retiree at age 65 from a local retirement system equal or exceed two-thirds of the allowance to which the employee would be entitled under the provisions of the Virginia Retirement System (VRS).

Although there is no formal procedure for making this comparison, we compared the least valuable rate under the Police Officers Retirement System to the most valuable accrual rate under the VRS, making adjustments for the fact that employee contributions are required in excess of the VRS 5% rate. We found that the employer-provided accrual rates do exceed two-thirds of the most valuable employer-provided accrual rates under the VRS plan.

We certify that, to the best of our knowledge and understanding, the Fairfax County Police Officers Retirement System satisfies the requirements of the Code of Virginia §51.1-800.

Certification

To the best of our knowledge, this section and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices that are consistent with the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinions contained in this section. This section does not address any contractual or legal issues. We are not attorneys and our firm does not provide any legal services or advice.

This section was prepared for the Fairfax County Police Officers Retirement System for the purposes described herein and for the use by the plan auditor in completing an audit related to the matters herein. Other users of this section are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any other user.

Sincerely, Cheiron

ing Shist

Fiona E. Liston, FSA Principal Consulting Actuary

Coralie A, Milligan, FSA Associate Actuary

Summary of Valuation Results

The Actuarially Determined Contribution rate for Fiscal Year (FY) 2016 was developed in the 2014 valuation report and was based on a corridor floor of 95%. For more information on the Corridor method please see the Funding Method section of this report.

Amounts disclosed in Note 4 of the Financial Section were developed in conjunction with the 2016 valuation. Prior to performing the 2016 valuation, a full experience study was performed using data from 2010-2015. As a result of this study many of the actuarial assumptions have been changed since the 2015 financial reporting. The impact of the changes can be found in the Schedule of Changes in the Net Pension Liability, as disclosed in the Financial Section. For more detail on the changes and analysis we would refer you to the experience study report.

The System historically used a July 1 date for both funding calculations and for accounting disclosures. While the System and the County disclosed liabilities under the Governmental Accounting Standards Board (GASB) Statements Numbers 25 and 27, this was an appropriate technique because this statement allowed for disclosure of liability and assets as of the prior year. Once GASB's Statements Numbers 67 and 68 required the System to disclose their best estimate of the liability as of the plan year-end, along with assets at the same date, the disclosure of year-end liabilities was moved to using rollforward techniques. This has led to a situation where the June 30, 2015 TPL was estimated while the July 1, 2015 actuarial liability for funding purposes was calculated using more recent data. The two liability measures ceased to match one another.

In order to address this discrepancy, starting with 2016 the Board has elected to use a June 30 valuation date based on collecting data and valuing liabilities figures as of December 31 and adjusting the resulting liabilities for a six month period to the following June 30. These June 30 liability figures are then be compared to the June 30 assets for purposes of both the funding and financial accounting disclosures. The same liability results will now be used for both the actuarial funding valuation and financial reports removing a source of confusion.

Summary of Actuarial Assumptions and Methods

Funding Method

The entry age normal funding method is used to determine costs. Under this method, the County contribution has three components: the normal cost, the payment toward the unfunded actuarial liability, and the expense rate.

The normal cost is a level percent of pay cost which, along with the member contributions, will pay for projected benefits at retirement for each plan participant.

The actuarial liability is that portion of the present value of future benefits that will not be paid by future County normal costs or member contributions. The difference between this liability and funds accumulated as of the same date is referred to as the unfunded actuarial liability.

The expense rate is added to cover the System's administrative expenses.

Under the corridor funding method, the County's total contribution rate is equal to the normal cost rate plus the UAL amortization rates for changes due to assumption changes or amendments passed since July 1, 2001 plus the expense rate as long as the System's actuarial funded ratio remains within a corridor of 90% to 120%. If the funded ratio falls outside this corridor, a credit (if above 120%) or charge (if below 90%) will be established based on a 15-year amortization equal to the amount necessary to re-enter the corridor. Once the funded ratio is within the corridor, the contribution rate will return to the normal cost rate plus amortization of post-2001 changes plus expense rate. The County is taking steps to increase the bottom of the corridor from the originally established 90% up to 100% by 2020. The Fiscal Year (FY) 2016 contribution was based on a corridor level of 95%.

Actuarial Value of Assets

For purposes of determining the County contribution to the System, we use an actuarial value of assets. The asset adjustment method dampens the volatility in asset values that could occur because of fluctuations in market conditions. Use of an asset smoothing method is consistent with the long-term nature of the actuarial valuation process.

In determining the actuarial value of assets, we calculate an expected actuarial value based on cash flow for the year and imputed returns at the actuarial assumption. This expected value is compared to the market value,

Actuarial Section

and one-third of the difference is added to the preliminary actuarial value to arrive at the final actuarial value.

Changes since Last Valuation

The funding liabilities are calculated as of December 31 of the prior year and adjusted using standard actuarial techniques to the June 30 valuation date.

Family Composition

For purposes of valuing the pre-retirement death benefit, an assumption is made concerning how many employees are married. The assumption used in this valuation is that 80% of active employees are married at death and that the female spouse is five years younger than the male spouse is.

Sick Leave Credit

The unused sick leave balance as reported for each active member is used as of the valuation date. Future sick leave accruals are assumed to accrue at 100% of each participant's annual average, but capped at 124 hours per year.

Economic Assumptions

| Investment Return: | 7.25% compounded per annum. | | | | | | |
|---|------------------------------|--|--|--|--|--|--|
| Rate of General Wage Increase: | 2.75% compounded per annum. | | | | | | |
| Rate of Increase in Cost- of-Living: | 2.50% compounded per annum.* | | | | | | |
| Total Payroll Increase | | | | | | | |
| (For amortization): | 2.75% compounded per annum. | | | | | | |
| Administrative Expenses: | 0.40% of payroll. | | | | | | |

* Benefit increases are limited to 4% per year.

Changes since Last Valuation

All assumptions have been updated in accordance with the 2015 experience study. Please see the experience study report for details on the analysis and the assumptions before and after adoption.

Analysis of Financial Experience Gain and Loss in Accrued Liability during Years Ended June 30¹ Resulting from Differences between Assumed Experience and Actual Experience

| Type of Activity | Investment Income | Combined Liability Experience | Gain (or Loss) During Year from Financial Experience | Non-Recurring Items | Composite Gain (or Loss) During Year |
|---------------------|----------------------|----------------------------------|---|------------------------|--|
| 2010 | (\$31,755,165.0) | \$3,313,576.0 | (\$28,441,589.0) | \$0.0 | (\$28,441,589.0) |

²Schedule uses actuarial value of assets. Results would be different if market value of assets were used. Despite the name of this exhibit, the liabilities presented in this schedule are not an appropriate measurement of the settlement value of the System.

The Statistical Section presents historical information regarding the retirement plan. This information includes a ten-year analysis of the sources of change in plan net assets, benefit payments, the number of retired members and average monthly benefits. Sources of additions include employer and plan member contributions and net investment income; deductions include benefit payments to retirees and beneficiaries, refunds of employee contributions and administrative expenses. The amounts of benefits paid, the count of benefit recipients and the average benefit payments are provided by type of benefit, including service retirement annuities, service-connected and ordinary disability benefits and survivor benefits.
