INTRODUCTORY

INTRODUCTORY

County of Fairfax, Virginia

To protect and enrich the quality of life for the people, neighborhoods and diverse communities of Fairfax County

November 19, 2025

Dear Members of the Board of Trustees and Members of the Fairfax County Police Officers Retirement System:

I am pleased to submit to you the Annual Comprehensive Financial Report (ACFR) of the Fairfax County Police Officers Retirement System (System) for the fiscal year ended June 30, 2025. This ACFR is provided as an aid to understanding the structure and evaluating the status of the System. The System's management is responsible for the accuracy of financial information contained herein. The Management's Discussion and Analysis provides further detail to the financial statements.

History

The Fairfax County Police Officers Retirement System was created under authority granted by Chapter 303 of the Acts of Assembly (law of the Commonwealth of Virginia) on March 29, 1944, to provide defined benefit pension plan coverage for sworn full-time law enforcement officers of the Fairfax County Police Department. In 1981 Fairfax County enacted Article 7 of the Fairfax County Code, which adopted and continued Chapter 303 as amended. There were 1,292 active members, 40 in the Deferred Retirement Option Program (DROP), 110 terminated vested members and 1,520 retirees participating in the System as of June 30, 2025. For calculations surrounding the Total Pension Liability and its components, Cheiron, the System's actuary, used June 30, 2025, as the measurement date which coincides with the actuarial valuation date.

Provisions

The benefit provisions of the System are established by County Ordinance. The System provides normal service retirement and early service retirement benefits for members who attain age or service requirements. Coverage for service-connected disability benefits is immediate upon membership in the System. Ordinary (non-service-related) disability benefits are provided after the attainment of five years of service. Members are vested after five years of service and are eligible for benefits at the early or normal service retirement date.

Capital Markets and Economic Conditions

In fiscal year 2025, the system stood at $1.971 billion, up from $1.825 billion at the end of fiscal year 2024. Using a time-weighted rate of return, the system returned +8.88% (net of fees) for the year ending 2025. Over the three-, five-, and ten-year annualized periods, the system returned +5.18%, +9.03%, and +6.26% (net of fees), respectively. Additional details on the markets and the System's investments are provided in the Investment Section.

Internal and Budgetary Controls

The System's management is responsible for the financial information presented in this report in accordance with U.S. Generally Accepted Accounting Principles. Proper internal accounting controls exist to provide reasonable, but not absolute, assurance for both the safekeeping of assets and the fair presentation of the financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the valuation of costs and benefits requires estimates and judgments by management.

Investment Policies and Strategies

The Board of Trustees (Board) has adopted a Statement of Investment Objectives and Policy. This Statement establishes the investment goals, guidelines, constraints and performance standards that the Board of Trustees uses when exercising its fiduciary duties to manage the investment assets of the System. The Board operates in conformity with the standard of care required in making investments as stated in the Code of Virginia §51.1-803. Please see Note 3 to the Financial Section of this report for a description of this standard of care and details on the System's investment policies and strategies.

The Board receives quarterly reporting from staff to ensure compliance with its stated objectives and policy. Staff also monitors the performance of the System and its investment managers and updates the Board on a monthly basis throughout the year. Rate of return information included in the Investment Section is calculated using a time-weighted rate of return and is prepared internally by County staff using data from the System and its investment managers.

Securities of the System, except for the pooled funds and the County's pooled cash and temporary investments, are held in safekeeping, on the System's behalf, by BNY Mellon Asset Servicing as agent. The BNY Mellon Financial Corporation, the parent company, carries Financial Institution bond insurance coverage including a Computer Crime Policy. An additional Excess Securities policy covers all risk of physical loss to securities.

Funded Status

An actuarial valuation of the System to determine funding requirements is performed annually. The System's funding policy provides for periodic employer contributions at actuarially determined rates, which are calculated as a percentage of covered payroll, and are adjusted as necessary to accumulate sufficient assets to meet the costs of benefit payments when due. As of the latest annual valuation, performed as of June 30, 2025, the ratio of the market value of assets to total pension liabilities for benefits increased from 76.95 percent to 77.30 percent. The actuarial section contains further information on the results of the June 30, 2025, valuation.

Based on the June 30, 2023, actuarial valuation, the employer contribution rate for 2025 following the adopted corridor-based funding policy increased to 57.57 percent from 50.87 percent of payroll. Working in concert with the County's Chief Financial Officer, the System's actuary (Cheiron) and other County staff, efforts continue to improve the funded status of the Plan. The assumptions used by the actuary to determine the County's contributions are very conservative and include the following components:

- The outstanding unfunded liability at the time that the County's funding policy was changed in 2015 are being amortized over a closed 15-year period, with that portion of the overall unfunded liability set to be paid off in FY 2035.
- Increases in unfunded liabilities identified in each year's actuarial valuation are amortized in closed 15-year periods.
- Any changes to benefit provisions that would increase the unfunded liability must be fully funded up front in the year adopted.
- The County will not reduce its contribution rate until the system attains full funding.

As of the latest actuarial valuation dated June 30, 2025, and based on current actuarial assumptions, the Employees' Retirement System is projected to achieve full funding by FY 2037.

Major Initiatives

During FY 2025, Funston Advisory Services completed a review of the governance practices of the system. Funston, who has conducted similar reviews for 60 other public pension plans, made recommendations to improve the system's overall governance practices. Their recommendations were based on their experience working with these institutions and on a comparative analysis of 38 other public pension plans of similar size to Fairfax's three retirement systems. Overall, the consultant noted that the system is "generally well run," but that, "as with any organization, improvements can always be made." They did not note any areas that could specifically result in investment underperformance or loss of assets. The recommendations included in the governance reports fall into the following areas:

- Governance Structure
- By-laws, Charters, and Policies
- Investment Policies and Processes
- Board Meetings and Operations
- Powers Reserved for the Board and Delegations
- Reporting and Board Oversight
- Board Interactions with Staff.

Staff completed a project to provide enhanced and more-focused investment presentations to the Board of Trustees. This included improvements to quarterly investment reviews and monthly reviews of manager performance by asset class.

Agilis performed an asset/liability study of the system's investment portfolio and presented the Board with projections of possible investment returns, funded status, and employer contribution rates under a range of investment market assumptions.

Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to The Fairfax County Police Officers Retirement System for its ACFR for the fiscal year ended June 30, 2024. This was

the fifteenth consecutive year that the System has achieved this prestigious award. To be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized ACFR. This report must satisfy both Generally Accepted Accounting Principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our ACFR continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

Fairfax County Retirement Systems received the Public Pension Standards Award for Funding and Administration for the fiscal year ended June 30, 2025, from the Public Pension Coordinating Council (PPCC), in recognition of meeting the professional standards for plan funding as set forth in the Public Pensions Standards. The PPCC is a confederation of the National Association of the State Retirement Administrators, the National Conference on Public Employee Retirement Systems and the National Council on Teacher Retirement.

Other Information

Independent Audit and Actuarial Certifications

Cherry Bekaert LLP performed an annual audit of the financial statements of the System to obtain reasonable assurance about whether the financial statements are free from material misstatements, whether due to fraud or error. Additionally, Cheiron performed an annual actuarial valuation to assess the plan's ability to meet future obligations. The report of independent auditor and certification from the actuary are included in this report.

Acknowledgments

This report is intended to provide complete and reliable information for determining the financial status of the System. It is being submitted to the Board of Supervisors and other interested parties and is available to the public via the County's website located at www.fairfaxcounty.gov/retirement/.

This annual report for the Police Officers Retirement System is the result of the hard work of the System's Accounting team, led by Accounting Manager Michelle Pagano-Dierkes and with the capable assistance of Accountant Sheny Montoya.

As always, I am very proud to lead the Retirement Systems team. These fine people work every day to provide the best possible service to the employees, retirees and citizens of Fairfax County.

Finally, I must express my deep appreciation, on behalf of the 2,962 members and beneficiaries of the Police Officers Retirement System, for your dedicated service as trustees.

Respectfully submitted,

Jeffrey K. Weiler

Report of Independent Auditor

To the Board of Supervisors
County of Fairfax, Virginia

To the Board of Trustees
Fairfax County Police Officers' Retirement System

Report on the Audit of the Financial Statements

Opinion
We have audited the accompanying financial statements of the Fairfax County Police Officers Retirement System (the "System"), a fiduciary component unit of the County of Fairfax, Virginia, as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the System's basic financial statements, as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the System, as of June 30, 2025, and the changes in fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions
We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are required to be independent of System, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements
Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the System's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with generally accepted auditing standards and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the System's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information, as listed in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the System's basic financial statements. The accompanying other supplementary information as listed in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the Introductory, Investment, Actuarial, and Statistical Sections but does not include the basic financial statements and our auditor's report thereon. Our opinion on the basic financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated November 19, 2025, on our consideration of the System's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the System's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards in considering the System's internal control over financial reporting and compliance

Orlando, Florida

Management's Discussion and Analysis
(Unaudited)

This section presents management's discussion and analysis of the Fairfax County Police Officers Retirement System's ("System" or "Plan") financial performance and provides an overview of the financial activities for the fiscal year ended June 30, 2025. The information in this section should be reviewed in conjunction with the Letter of Transmittal located in the Introductory Section.

Overview of Financial Statements and Accompanying Information

The financial presentation is composed of four parts: (1) the financial statements; (2) notes to the financial statements; (3) required supplementary information and (4) other supplementary information. Below is the summary of the information provided in each of these sections.

Financial Statements

The System presents the Statement of Fiduciary Net Position as of June 30, 2025, and Statement of Changes in Fiduciary Net Position for the fiscal year ended June 30, 2025. The Statement of Fiduciary Net Position provides a snapshot of the financial position. It reports the assets, liabilities and resulting net position restricted for pension benefits. The Statement of Changes in Fiduciary Net Position presents the Plan's transactions under the categories of Additions and Deductions. Additions include contributions from the County and by participating employees, net appreciation in the fair value of investments, dividend and interest income. Investment income is reduced by investment-related expenses such as asset management fees, custody charges and consulting fees. Deductions include outlays for monthly pension benefits, death benefits, refunds of contributions to employees and fees paid for professional services and administrative expenses.

Notes to the Financial Statements

The Notes to the Financial Statements are an integral part of the financial statements and include additional information and schedules to provide a better understanding of the fiduciary fund financial statements. The Notes to the Financial Statements include detailed information that is not readily evident in the financial statements such as the accounting policies, plan membership and benefits, and summary disclosures. Specifically:

- Note 1 Describes significant accounting policies.
- Note 2 Provides a description of the System, the funding policy, and member contributions and benefits.
- Note 3 Describes the investments and disclosures on fair value hierarchy, interest rate, credit quality, foreign currency risk, derivatives disclosures, and securities lending.
- Note 4 Describes the net pension liability, actuarial method and assumptions.
- Note 5 Discusses the accounting of subscription-based information technology arrangements (SBITAs), the right-to-use subscription asset, and a subscription liability.
- Note 6 Explains the System's tax status.

Required Supplementary Information

This section consists of historical trend exhibits such as the Schedule of Changes in Collective Net Pension Liability and Related Ratios, Schedule of Net Pension Liability, Schedule of Collective Employer Contributions accompanied by the Notes to Schedule and Schedule of Money-Weighted Rate of Return. A Summary of Significant Changes to the Pension System is also included.

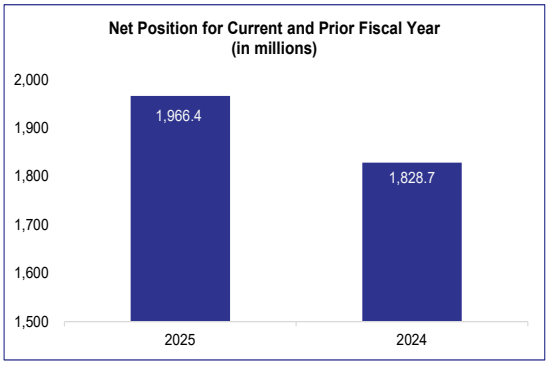
Other Supplementary Information

This section includes the Schedule of Administrative Expenses and the Schedule of Investment and Consultant Expenses.

Required Supplementary Information and Supplementary Information are immediately following the Notes to the Financial Statements.

Financial Highlights

The net position restricted for pension benefits as of June 30, 2025, and June 30, 2024, was $1,966.4 million and $1,828.7 million, respectively. The net position restricted for pension benefits representing assets available to pay for current and future member pension benefits, increased by $137.7 million or 7.5 percent.



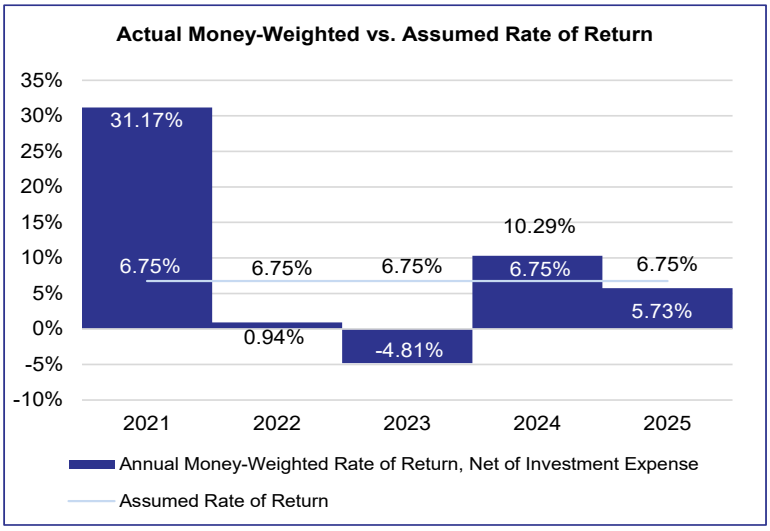
Total additions to fiduciary net position decreased from $264.4 million in fiscal year 2024 to $262.4 million in 2025.

	2025	2024
Net Pension Liability (in millions)	$577.6	$547.7
Net Position as Percentage of TPL	77.30%	76.95%
Covered Payroll (in millions)	$149.4	$134.2
Net Pension Liability as Percentage of Covered Payroll	386.59%	408.04%

The System utilizes two methodologies when analyzing investment returns. They may vary from each other in any given period. For GAAP accounting valuation purposes, a money-weighted return is used. A money-weighted rate of return calculates the investment performance accounting for all cash flows (contributions and withdrawals) occurring during the performance measurement period. The System's investment returns, net of fees, on a money-weighted rate of return decreased from 10.29 percent in fiscal year 2024 to 5.73 percent in fiscal year 2025.

For investment performance reporting purposes, the System relies on a time-weighted approach. A time-weighted rate of return minimizes the impact of cash flows occurring throughout the measurement period. This methodology allows the System to compare its investment performance with relevant benchmark returns, as well as its performance with other pension plans. The System's investment returns, net of fees, on a time-weighted rate of return decreased from 11.17 percent to 8.88 percent in fiscal year 2025.

The annual money-weighted rate of return of 5.73 percent did not exceed the assumed 6.75 percent rate of return, net of fees, for the year ended June 30, 2025.



An actuarial valuation is performed annually by Cheiron. The actuarial value of the assets as of the last valuation on June 30, 2025, was $1,975.2 million, while actuarial liabilities as of the same period were $2,544.0 million. As of June 30, 2025, the date of the most recent actuarial valuation, the funded ratio of the System was 77.64 percent. This was a decrease of 1.29 percent from the June 30, 2024, valuation funded ratio of 78.93 percent.

Under GAAP calculation, using the December 31, 2024, data rolled forward to June 30, 2025, the plan fiduciary net position as a percentage of the total pension liability was 77.30 percent. It increased from 76.95 percent in fiscal year 2024, primarily as a result of the increase in the plan fiduciary net position. The Total Pension Liability as of June 30, 2025, and June 30, 2024, was $2,544.0 million and $2,376.4 million, respectively.

(Dollars in millions)	**2025**	**2024**
Actuarial Accrued Liability	$2,544.0	$2,376.4
Actuarial Value of Assets	1,975.2	1,875.7
Unfunded Actuarial Liability	$568.8	$500.7
Funding Ratio	77.64%	78.93%
Total Pension Liability	$2,544.0	$2,376.4
Plan Fiduciary Net Position	1,966.4	1,828.7
Net Pension Liability	$577.6	$547.7
Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	77.30%	76.95%

Financial Analysis

Plan Fiduciary Net Position
When viewed over time, increases or decreases in plan fiduciary net position can be used to measure the financial condition of a pension plan.

For fiscal year 2025, the fiduciary net position of the Police Officers Retirement System increased 7.5 percent, resulting in a total fiduciary net position value of $1,966.4 million, reflecting an increase of $137.7 million over fiscal year 2024.

Total assets as of June 30, 2025, was $2,129.9 million, representing an increase of $174.2 million, or 8.9 percent over the previous fiscal year. The main component of the increase was due to the 8.1 percent or $147.5 million increase in cash and investments, from $1,826.4 million in fiscal year 2024 to $1,973.9 million in fiscal year 2025 as a result of the favorable market conditions. The receivables increased by $28.9 million or 22.9 percent.

The table below details the Police Retirement System's net position for the current and prior year.

Net Position for Current and Prior Fiscal Year

Fiscal Year	Ending Balances (millions)	Net Change in Dollars (millions)	Net Change in Percent
2025	$1,966.4	$137.7	7.5%
2024	1,828.7	150.8	9.0%

Summary of Plan Fiduciary Net Position

Assets	2025	2024	Difference	Percentage of Change

Management's Discussion and Analysis
(continued)

	2025	2024	Difference	Percentage of Change
Accrued Expenses (in thousands)	$4,529.1	$3,854.8	$674.3	17.5%

Dollars (in thousdands)	2025	2024	Difference	Percentage of Change
Interest	$4,129.0	$4,835.0	($706.0)	-14.6%
Dividends	7,562.0	5,409.4	2,152.6	39.8%
Total	**$11,691.0**	**$10,244.4**	**$1,446.6**	14.1%

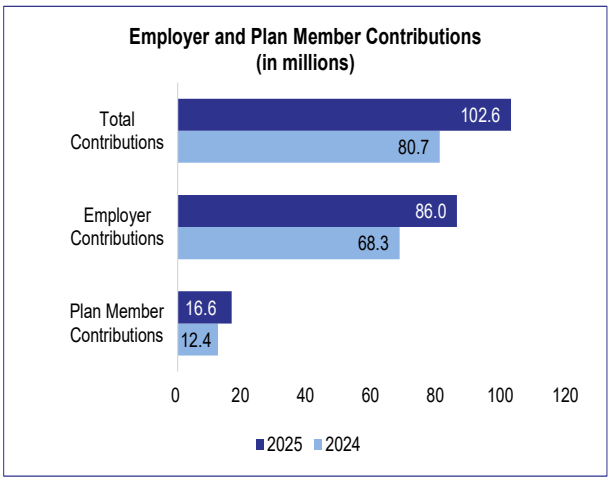
Total liabilities as of June 30, 2025, were $163.5 million, representing an increase of $36.4 million, or 28.7 percent, over the previous year. The increase in total liabilities is due to an increase in the purchase of investments from $119.3 million as of fiscal year 2024 to $155.9 million as of fiscal year 2025. There was a 17.5 percent increase in accrued expenses, including the year-end accrual for management fees.

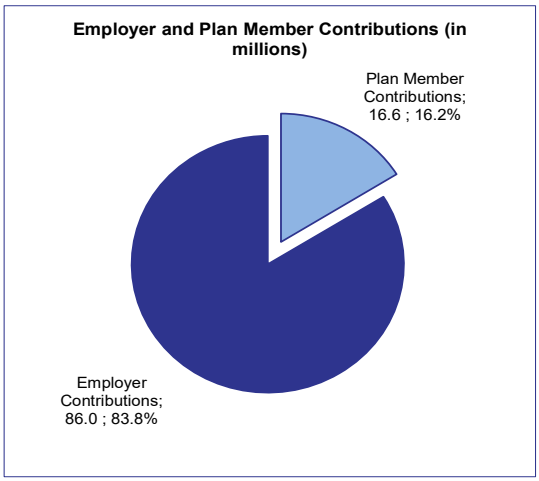
The total assets of $2,129.9 million exceeded its liabilities of $163.5 million at the close of the Plan year ended June 30, 2025 with $1,966.4 million in fiduciary net position restricted for pension benefits.

The Plan's investments are exposed to various risks including interest rate, market and credit risks. These risks may be influenced by changes in economic conditions and market conditions. Therefore, it is reasonable to assume that there will be changes in the values of the investments held in trust, which could materially affect the amounts reported in the financial statements. Detailed information on investment results are in the Investment Section of this report.

Additions and Deductions

Total additions to the retirement fund consist of contributions from employers and active members and changes in the value of assets. Total additions decreased by $2.0 million or 0.8 percent, primarily due to a downturn in investment growth in fiscal year 2025 versus fiscal year 2024. The interest and dividend income experienced an increase of 14.1 percent. The significant increase in total additions was primarily due to the favorable market environment and contributions in fiscal year 2025.

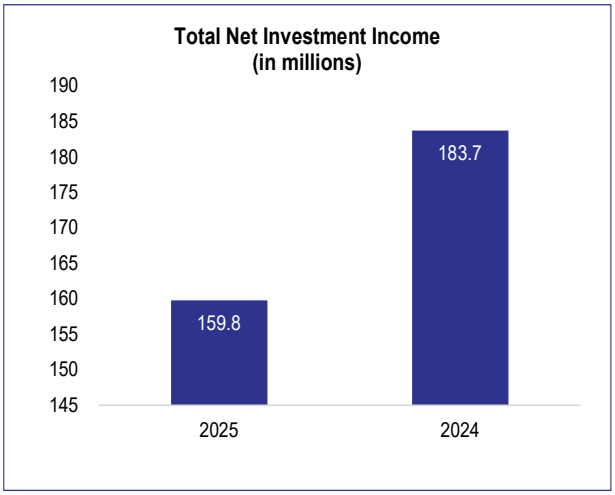




Management's Discussion and Analysis
(continued)

Total contributions for the fiscal year ended June 30, 2025, amounted to $102.6 million. This was an increase of $21.9 million when compared with the activity of fiscal year 2024. While the contribution rate increased to 57.57 percent from 50.87 percent, employer contributions increased by 26.0 percent and employee contributions increased by 34.3 percent for fiscal year 2025. The increases in employer and plan member contributions were primarily due to overall salary increases for contributing membership and impacted by other factors including buybacks, different membership tiers, the timing of members coming in and out of the plan, and the number of pay periods fluctuating from year to year.

Investment returns had a positive impact for fiscal year 2025, reflecting favorable returns in the capital markets. Total net investment income (including securities lending) decreased from $183.7 million in fiscal year 2024 to a $159.8 million in fiscal year 2025. The fiscal year had significant market volatility contributing to a lower gain than fiscal year 2024.

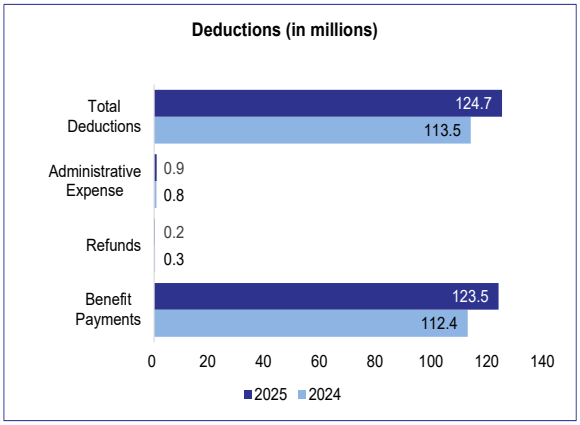


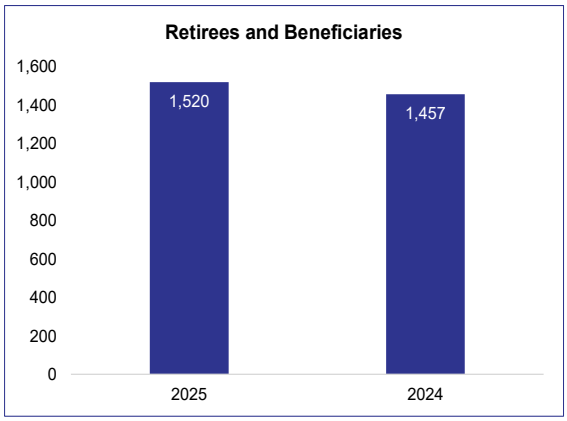
Summary of Additions and Deductions

Additions	2025	2024	Difference	Percentage of Change
Employer Contributions	$86,013,744	$68,285,368	$17,728,376	26.0%
Plan Member Contributions	16,606,701	12,363,339	4,243,362	34.3%
Net Income (Loss) from Investments	159,728,725	183,689,814	(23,961,089)	13.0%
Net Income from Securities Lending	21,625	28,715	(7,090)	-24.7%
Total Additions, Net of Losses	262,370,795	264,367,236	(1,996,441)	0.8%
Deductions				
Benefit Payments	$123,504,084	$112,412,886	$11,091,198	9.9%
Refunds	232,067	332,216	(100,149)	-30.1%
Administrative Expense	920,907	799,429	121,478	15.2%
Total Deductions	124,657,058	113,544,531	11,112,527	9.8%
Net Increase/(Decrease)	137,713,737	150,822,705	(13,108,968)	-8.7%
Net Position Beginning of Fiscal Year	1,828,703,426	1,677,880,721	150,822,705	9.0%
Net Position End of Fiscal Year	**1,966,417,163**	**$1,828,703,426**	**$137,713,737**	7.5%

Management's Discussion and Analysis
(continued)

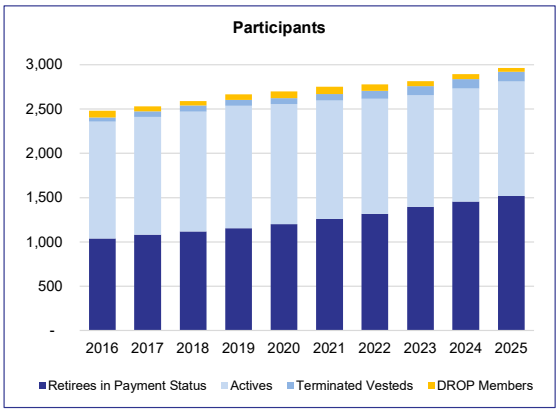
Total deductions of the System consist of the payments of benefits to retirees and beneficiaries, the refund of contributions to former members and the cost of administering the System. The total deductions for fiscal year 2025 were $124.7 million, an increase of $11.2 million, or 9.8 percent, over fiscal year 2024.



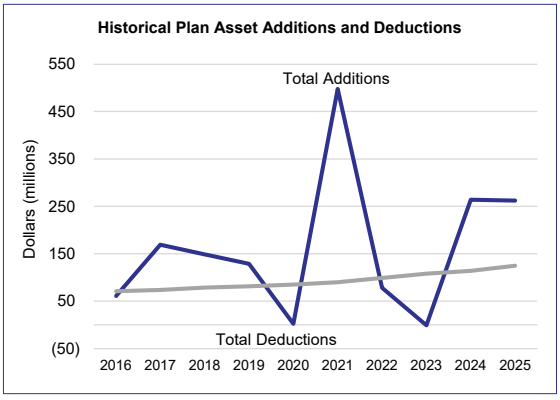


Regular pension benefit payments increased as the number of retirees and beneficiaries receiving benefit payments rose to 1,520 in fiscal year 2025 from 1,457 in fiscal year 2024. Benefit payments also increased due to a cost-of-living adjustment increase of 3.4 percent and higher average benefits for new retirees. Refunds reflected a -30.1 percent decrease due to less former employees requesting refunds or lower balances of refunded amounts.

Participant Count	2025	2024
Actives	1,292	1,276
DROP Members	40	55
Terminated Vesteds	110	105
Retirees and Beneficiaries in Payment Status	1,520	1,457
Total	**2,962**	**2,893**



Historical additions to and deductions from fiduciary net position indicate a pattern of steadily increasing deductions as compared to fluctuating additions as a result of the unpredictable market environment.



Contacting the System's Financial Management

This financial report is designed to provide our membership, the Board of Trustees and the County's Board of Supervisors with a general overview of the System's financial condition. If you have any questions about this report or need additional information, contact the Fairfax County Retirement System, 12015 Route 50, Fairfax, VA 22033. This report can also be found on the County's internet site at www.fairfaxcounty.gov/retirement/.

Notes to the Financial Statements

The Fairfax County Police Officers Retirement System ("System" or "Plan") is a legally separate single-employer defined benefit pension plan established under the Code of Virginia to provide defined pension benefits to certain Fairfax County, Virginia ("County") police. As such, the System is considered part of the County reporting entity and its financial statements are included in the County's basic financial statements as a pension trust fund.

Note 1. Summary of Significant Accounting Policies

A. Basis of Accounting

The System's basic financial statements have been prepared under the accrual basis of accounting in accordance with accounting principles applicable to governmental units in the United States of America (GAAP). Member and employer contributions to the plan are recognized in the period in which the contributions are due pursuant to legal requirements. Benefits and refunds are recognized when due in accordance with the terms of the plan. The cost of administering the plan is paid by the System.

For financial reporting purposes, the System adheres to GAAP. The System applies all applicable pronouncements of the Governmental Accounting Standards Board (GASB).

B. Method Used to Value Investments

Short-term investments are reported at fair value when published market prices and quotations are available, or at a cost plus accrued interest, which approximates market or fair value. All other investments are reported at fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Asset-backed securities are valued on the basis of future principal and interest payments and are discounted at prevailing interest rates for similar instruments. Because of the inherent uncertainty in valuing these securities, the fair value may differ from the values that would have been used had a ready market for such securities existed. Accordingly, the realized value received upon the sale of the assets may differ from the fair value. The System records investment purchases and sales as of trade date. These transactions are not finalized until the settlement date, which occurs approximately three business days after the trade date. The amounts of trade receivables and payables are shown as receivables and payables on the Statement of Fiduciary Net Position. Cash received as collateral on securities lending transactions and investments made with such cash are reported as assets along with a related liability for collateral received. The fair values of private investments and private real estate are generally lagged by at least one quarter due to the timing of receipt of private market valuations and information.

C. Equity in County's Pooled Cash and Temporary Investments

The System maintains cash with the County, which invests cash and allocates interest earned, net of a management fee, on a daily basis to the System based on the System's average daily balance of equity in pooled cash. As of June 30, 2025, the bank balance of the County's public deposits was either insured by the Federal Deposit Insurance Corporation or through the State Treasury Board pursuant to the provisions of the Security for Public Deposit Act. The County's investments are exposed to various risks such as interest rate, market and credit risks. Such risks, and the resulting investment security values, may be influenced by changes in economic conditions and market perceptions and expectations. Accordingly, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.

D. Compensated Absences

Employees are granted vacation and sick leave based on their length of service. Unused annual and compensatory leave is payable to employees upon termination based on the employees' current rate of pay, up to certain limits. Sick leave does not vest with the employees; however, it is converted to years of service upon retirement. In addition, employees may accrue compensatory leave for hours worked in excess of their scheduled hours. Compensatory leave in excess of 240 hours is forfeited at the end of the calendar year.

The System recognizes a liability for compensated absences for leave time that (1) has been earned for services previously rendered by employees, (2) accumulates and is allowed to be carried over to subsequent years, and (3) is more likely than not to be used as time off or settled during or upon separation from employment. Based on the criteria listed, three types of leave qualify for liability recognition for compensated absences – annual, compensatory, and sick leave. The liability for compensated absences includes salary-related benefits, where applicable.

Employees are granted annual and sick leave based on their length of service. Unused annual and compensatory leave is payable to employees upon termination based on the employees' current rate of pay, up to certain limits. Employees may accrue compensatory leave for hours worked in excess of their scheduled hours. Compensatory leave in excess of 240 hours is forfeited at the end of the calendar year. Sick leave does not vest with the employees; however, it is converted to years of service upon retirement. Liabilities for the estimated value of leave that will be used by employees as time off is included in the liability for compensated absences.

During the current fiscal year, Fairfax County Police Officers Retirement System implemented the requirements of GASB Statement No. 101, Compensated Absences. GASB 101 clarifies the accounting and financial reporting treatment for compensated absences, including refinements in the recognition and measurement requirements.

As part of implementing GASB 101, review of methodology for calculating compensated absences resulted in a minor adjustment to the reported liability for prior periods. While the adjustment requires a restatement to align with the updated guidance provided by GASB 101, the amount of the adjustment was not material to the financial statements. As such, no changes were made to the amounts presented in the basic financial statements for the prior period. The System has adopted the necessary refinements to ensure ongoing compliance with GASB 101 and to improve the accuracy of its compensated absences liabilities in current and future reporting periods.

Compensated Absences	
FY 2024 Beginning Balance	$93,624
Net Change	119,434
FY 2025 Ending Balance	$213,058
Due Within One Year	$29,452

Note 2. Summary of Plan Provisions

A. Plan Description and Provision

The Police Officers Retirement System is a single-employer defined benefit pension plan. Benefit provisions are established and may be amended by County ordinance. All benefits vest at five years of service. The general provisions of the Police Officers Retirement System are as follows:

Membership
The plan covers County police officers who are not covered by other plans of the County or the Virginia Retirement System. Members sworn before January 1, 2013, are members of Plan A. Members sworn on January 1, 2013, or between January 1, 2013, and July 1, 2019, are members of Plan B. Members sworn on or after July 1, 2019, are members of Plan C.

Contribution Rate
The member contribution rate is set by the County Ordinance and is currently 8.65 percent of base salary. The County contribution rate is set by the actuarial process and was 57.57 percent for fiscal year 2025. Police Officers do not participate in Social Security.

Normal Retirement
To be eligible for normal retirement, an individual must meet the following criteria: (a) if employed before July 1, 1981; attained the age of 55 or completed 20 years of service, or (b) if employed on or after July 1, 1981; attained the age of 55 or completed 25 years of service.

The normal retirement benefit for Plans A and B is 2.8 percent of average final compensation (i.e., the highest consecutive three years) multiplied by creditable service at date of termination, and increased by 3 percent. Plan C calculation of normal benefit does not include the additional 3 percent.

Early Retirement
A member is eligible for early retirement if under the age of 55 with at least 20 years of creditable service. This is the normal retirement benefit calculated using average final compensation and service at early retirement, actuarially reduced, and increased by 3 percent.

Deferred Retirement Option Program (DROP)
Those eligible for normal retirement may enter DROP for a period of up to three years. Members can only participate in DROP once, and their election is irrevocable.

Deferred Vested Retirement
Deferred vested retirement is available for vested members (vesting is at 5 years of service), who leave their contributions in the System when they terminate employment. At age 55, these members are entitled to their normal retirement benefit based on service with the Police Department.

Service-Connected Disability Retirement
Service-connected disability retirement is available for members, regardless of their length of service, who become disabled as a result of a job-related illness or injury. Benefits for total disability are 66.67 percent of the salary, reduced by any Workers' Compensation benefits. These benefits continue during the existence of the disability.

Non-Service Connected Disability Retirement
Non-service connected disability retirement is available for vested members who become disabled due to an injury or illness that is not job-related. Normal retirement benefits are paid.

Death Benefits
If death occurs prior to retirement:

An automatic monthly benefit is payable to the member's spouse and children. This benefit equals $2,653.49 for the spouse or surviving handicapped child (if there is no spouse), plus each eligible child receives $1,061.39 up to a maximum total family benefit of $5,306.97 (these benefits are indexed to inflation). If the

death occurred in the line of duty, the spouse or surviving handicapped child (if there is no spouse) may elect to receive 66.67 percent of the member's regular salary at the time of death in lieu of the automatic benefits.

If death occurs after retirement:

In addition to the automatic benefit detailed above, at the time the member retires, the Plan provides for the member to elect survivor benefit options for the Surviving Spouse or a Handicapped Child at 25 percent, 50 percent, 66.67 percent, 75 percent or 100 percent of the retiree's benefit.

Cost of Living Benefit

Annual cost of living adjustments (COLAs) are provided to retirees and beneficiaries and are equal to the lesser of 2.7 percent or the percentage increase in the Consumer Price Index for the Metropolitan Statistical Area that includes Fairfax County.

Benefit Limits

Benefits are limited to the maximum amounts for qualified plans as set forth in Section 415 of the Internal Revenue Code. A separate, nonqualified benefit restoration plan has been established for the payment of any benefit formula amounts in excess of the Section 415 limit.

Note: Detailed provisions may be found in the Retirement Handbook for Active Employees.

B. Board of Trustees

Eight members serve on the Fairfax County Police Officers Retirement System (Board). Three of the members are citizens appointed by the Fairfax County Board of Supervisors. Three of the members are elected by Fairfax County Government Employees, and one of the members is elected by retirees. The Director of Finance also serves as an Ex-Officio member.

C. Membership

At June 30, 2025, the date of the latest actuarial valuation, membership in the System consisted of:

Retirees and Beneficiaries Receiving Benefits	1,520
Terminated Vesteds	110
Deferred Retirement Option Program (DROP) Participants	40
Active Plan Members	1,292
Total	**2,962**

D. Deferred Retirement Option Program

Members eligible for normal retirement may elect to enter the DROP. As a DROP member, he or she will continue to work and receive a salary for a maximum period of three years while an amount equal to what could have been received as a retirement benefit is credited to his or her DROP account. The monthly benefit that will be credited to the DROP account is determined by the years of service and Average Final Compensation at the DROP entry date. During the DROP period, the retirement plan accumulates his or her accrued monthly benefit which is payable at the end of the DROP period. The DROP account balance is credited at an annual interest rate of 5 percent, compounded monthly. At the end of the DROP period, the DROP member must terminate employment with the Fairfax County Government and will begin receiving his or her monthly retirement benefit. Upon DROP exit, the retiree can elect to receive the balance of the DROP account in the form of a lump sum distribution, a rollover to another qualified plan (or IRA), or as an addition to the monthly retirement annuity. The DROP balance as of June 30, 2025, was $5.7 million.

E. Contributions

The contribution requirements of the System's members are established and may

be amended by County ordinances. Member contributions are based on 8.65 percent of compensation for the year ended June 30, 2025. The County is required to contribute at an actuarially determined rate; the rate for the year ended June 30, 2025, was 57.57 percent of annual covered payroll. Total contributions for the fiscal year ended June 30, 2025, amounted to $102.6 million.

F. Deductions

The deductions from the System include the payment of retiree and beneficiary payments, the refund of employee contributions to former members and administrative expenses. The total deductions for the fiscal year ended June 30, 2025, amounted to $124.7 million.

Note 3. Investments

A. Investment Policy

The authority to establish the System is set forth in Chapter 303 of the Acts of Assembly (law of the Commonwealth of Virginia). Section 26-45.1 of the Code of Virginia (Code), updated by Section 51.1-803, authorizes fiduciaries of the System to purchase investments with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of like character and with the same aims. The Board shall also diversify such investments as to minimize the risk of large losses unless under the circumstances it is clearly prudent not to do so.

The System's Board of Trustees has adopted the Police Officers Retirement System Statement of Investment Objectives and Policy which establishes a broad set of investment objectives, guidelines, risk tolerance and performance standards for the assets of the System. The Board of Trustees has the authority to amend the investment policy. The Board recognizes that investing in worldwide capital markets inherently entails the assumption of risk. The Board believes that part of the risk involved in managing the System's assets can be reduced by investing in diversified, lowly-correlated asset classes and employing different philosophies and investment management styles. The Board has selected a long-term strategic asset allocation strategy which provides a high degree of diversification, maintains appropriate asset coverage of plan liabilities, and also optimizes investment return. Investment decisions for these assets are made by the Board of Trustees or investment managers selected by the Board. The Board hires each of its investment advisory firms on the basis of its specific area of expertise as well as its fit with the total risk and return objectives of the System. Each manager exercises investment discretion around specifically mandated quality, concentration, benchmark and performance guidelines, and practices active risk controls in order to achieve the System's investment expectations.

The following was the System's adopted asset allocation policy as of June 30, 2025. The asset allocation policy commonly exceeds 100 percent because of target exposures to both direct investments in asset classes plus notional exposure to asset classes through derivative positions such as Futures held at the portfolio level. Also, the System commonly includes notional exposures for select Investment Managers that have a mandate from the Board to provide the System with additional asset class exposure using leverage or derivatives.

B. Concentrations

For the most part, the overall investment policy does not identify a specific level of credit risk, interest rate risk or foreign currency risk. That is addressed at the individual account level. The guideline for "concentration of risk" is system-wide, however the System does not hold investments (other than U.S. Government and

Asset Class	Target Exposure
Absolute Return	20.0%
Global Equity	30.0%
Global Fixed Income	47.5%
Global Multi-Asset	20.0%
Global Real Assets	17.5%

U.S. Government-guaranteed obligations) in any one security that represent 5.0 percent or more of fiduciary net position available for benefits. All investments, except for the pooled and mutual funds, short-term investment fund and a short-term collateral investment pool are held by an unaffiliated custodian. There is no custodial credit risk since the custodian's records establish the System's interest in the securities and the custodian provides insurance for all custody assets.

C. Rate of Return

For the year ended June 30, 2025, the annual money-weighted rate of return on pension plan investment, net of pension plan investment expense, was 5.73 percent. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

D. Fair Value Hierarchy

The System measures and records its investments using fair value hierarchy measurement guidelines established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the asset and gives the highest level to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest level to unobservable inputs (Level 3 measurements).

Investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy.

In instances where inputs used to measure fair value fall into different levels in the fair value hierarchy, fair value measurements in

Level 1	Unadjusted quoted prices for identical instruments in active markets.
Level 2	Observable inputs other than quoted market prices.
Level 3	Valuation derived from valuation techniques in which significant inputs are unobservable.

their entirety are categorized based on the lowest level input that is significant to the valuation. The table below shows the fair value levels of the investments.

Equities and fixed income securities classified in Level 1 are valued using prices quoted in the active markets for those securities. Securities in Level 2 and Level 3 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features and ratings. Matrix pricing is used to value securities based on the securities' relationships to benchmark quoted prices. Level 3 securities use proprietary information or single source pricing.

Absolute Return

Global Macro:

This type includes five hedge funds. The first one has 100+ active ideas across fixed income, currencies, equities, and commodities. The process is equally driven by analysis of the macro environment, flows of capital, and the

Notes to the Financial Statements

expected reaction to changes in interest rates and other drivers. The second one is a Commodity Trading Advisor (CTA) that analyzes market prices to determine trends and then uses tactical asset allocation to capture and ride market trends. The Fund is a diversified portfolio with exposure to currencies, commodities, bonds and short interest rates, and equity indices at various times. These exposures are typically achieved using derivatives which allows quick response because of the high liquidity in the derivative markets. The third one is a short-term systematic global macro-CTA and is unique vs. other systematic macro hedge funds. Such short-term managers tend to not only be uncorrelated to long-only beta, hedge funds broadly and other global macro hedge funds specifically, they are also generally uncorrelated to each other within their own peer group. These features give them extremely attractive diversification characteristics. The fourth one is a discretionary global macro strategy with an emerging markets bias. Portfolio consists of 3-5 medium to long-term structural themes per year with active short-term positioning. Strategy invests across equities, fixed income, currency, credit, and commodities. The fifth fund integrates two complementary components: a momentum-based strategy focused on sustainable, uncorrelated returns, and a multi-strategy approach that combines their systematic models to achieve consistent, alpha-driven performance. Together, they operate as a unified strategy aimed at delivering robust, diversified results. The fair values of the investments in this type have been determined using NAV per share (or its equivalent) of the investments.

Event Driven:

This type includes one hedge fund. It focuses on global long/short credit and event driven positions, investing across the capital structure. The fund is directionally agnostic and over time has been net long and opportunistically net short. The fair values of the investments in this type have been determined using NAV per share (or its equivalent) of the investments.

Relative Value/Multi-Strategy:

This type includes four hedge funds. The first fund is a multi-strategy hedge fund which deploys capital across a range of asset classes, investment strategies and geographies. The five core investment strategies are: Equities, Credit, Fixed Income & Macro, Commodities, and Quantitative. The second fund is a market neutral multi-strategy fund whose return stream should be largely uncorrelated to the broader markets. The third fund is a multi-strategy investment firm focused on the digital asset sector, which employs an active, long/short approach – thereby reducing the volatility of a long- only, passive investment. The fourth strategy combines three components: Pure Momentum Plus (65%), a core trend-following strategy that trades over 120 highly liquid futures and FX forward markets; Defensive Equities (30%), a long/short quality strategy designed to capture the “flight to quality” effect during equity market sell-offs; and Inflation Aware (5%), a strategy explicitly built to navigate inflationary and deflationary environments—shorting bonds and equities while going long commodities in periods of inflation, and taking the opposite positions during deflation.

Global Equity

U.S. Equities:

This type includes one hedge fund and several private funds. The hedge fund is a U.S. small cap deep value long/short equity fund. The team looks for companies with management or capital structure issues. They identify undervalued companies and then perform a fundamental value analysis to find catalysts that may spark change in the company. The Fund will then, on its own or together with other members of a group, acquire a controlling interest in the company and then force management to

enact the changes they feel are necessary for a turnaround. The fair value has been determined by using NAV per share (or its equivalent) of the investments.

The private equity allocation includes several private funds which represent strategies diversified across a broad range of high-growth sectors and strategies, with a strong emphasis on innovation and early-stage opportunities. It includes funds that acquire minority stakes in institutionalized asset managers, as well as those investing in blockchain infrastructure, digital assets, and early-stage blockchain ventures. Several funds focus on the intersection of artificial intelligence and emerging technologies, alongside transformative computing innovations. There is significant exposure to fintech and financial infrastructure, including real-time payments, digital banking, regulatory technology, and AI-driven credit models. The allocation also includes life sciences and healthcare strategies targeting therapeutics, diagnostics, and medical devices, with a focus on both early-stage innovation and academic spinouts. Additionally, it incorporates venture debt and hybrid structures that offer attractive risk-adjusted returns, as well as funds focused on national security-relevant deep tech, cybersecurity, enterprise software, and data analytics. Finally, the portfolio features exposure to venture studios and company formation platforms, enabling participation at the earliest stages of the equity value creation chain. Overall, the allocation seeks to capture upside from technological disruption while maintaining downside protection through structured capital and sectoral diversification.

International Equities:

This includes two managers. The first one is an international small cap long/short equity fund that uses a quantitative approach. In addition to traditional value measures such as price/earnings and price/book ratios, the firm also considers growth-related factors, such as price momentum and trends in analysts' earnings estimates, to target undervalued companies that have strong prospects for future outperformance. The second fund seeks long-term capital appreciation by investing primarily in companies located in emerging market countries and opportunistically, in frontier market countries. The portfolio typically holds 30-50 companies within global emerging markets. Country and sector exposures are primarily a by-product of individual stock selection. The fair value of these funds has been determined by using NAV per share (or its equivalent) of the investments.

Global Fixed Income

This type includes seven public debt funds and several private debt funds. The first fund invests in undervalued mortgage-backed securities (MBS) in a strategic total return strategy. The portfolio mainly consists of a combination of agency and nonagency residential mortgages. Financial analysis allows them to understand both the fixed income characteristics and the mortgages that make up the underlying collateral. The second fund incorporates a best ideas approach from a broad range of emerging markets sovereign bonds, corporate bonds, local bonds, currencies, and volatility through long and short exposures. The third fund uses a macroeconomic approach for fixed income management. The firm places all its efforts on the correct duration/maturity, which has generated the firm's advantage over the indices. The firm invests in U.S. Treasury securities only. The fourth fund provides exposure to various yield-oriented and systematic trading strategies across the digital assets sector. The fifth fund seeks to maximize current income by investing primarily in high-yield bonds while mitigating credit risk. The strategy is designed to provide core high yield exposure. The sixth fund invests in Treasury Inflation-Protected Securities (TIPS) which are a type of Treasury security issued by the U.S. government. TIPS

are indexed to inflation to protect investors from a decline in the purchasing power of their money. The seventh fund holds a strategic allocation to global inflation-linked bonds and U.S. Treasury Inflation-Protected Securities (TIPS).

The private debt funds provide broad exposure to Direct Lending as well as Opportunistic Credit.

Direct Lending:

Direct lending provides loans directly to private companies—typically middle-market firms—bypassing traditional banks, in exchange for interest income and potential equity participation.

Opportunistic Credit:

Opportunistic Credit includes opportunistic/ distressed funds investing in public and private debt, equity and real estate as opportunities present themselves. These investments cannot be redeemed. Instead, the nature of the investments in these private debt funds are that distributions are received through the liquidation of underlying assets of the funds over a period of years as per the terms of the fund.

Global Multi-Asset

This type includes three funds that invest across asset classes using a risk balanced approach in their asset allocation of the Funds with the intent to balance risk across all four combinations of Rising and Falling Growth and Inflation. The main goal is to construct a portfolio that achieves the best risk adjusted return at a 10 percent expected volatility by overweighting the lower risk asset classes and balance expected returns in inflationary, deflation, high growth, and low growth periods. This is achieved using derivatives and long liquid positions across multiple asset classes. The fair values of the investments in this type have been determined using NAV per share (or its equivalent) of the investments.

Global Real Assets

The real assets allocation encompasses a diverse mix of nine funds spanning real estate, infrastructure, natural resources, and commodities. Strategies include investments in publicly traded REITs, listed infrastructure, natural resource equities (such as timber and agriculture), precious metals, and inflation-linked securities, with tactical portfolio adjustments made quarterly. Several funds acquire interests in private real estate funds on the secondary market, offering opportunistic access to existing assets. The allocation also includes hybrid strategies investing in both public and private equities of companies transforming transportation, logistics, and infrastructure. Additional exposure includes real assets such as agricultural operations, specifically vertically integrated cattle feeding enterprise, where returns are realized through long-term asset liquidations. Other strategies focus on value creation across the commodity supply chain through physical trading, hedging, and arbitrage, as well as opportunistic investments in the energy sector through distressed debt, special situations, and private equity transactions. Collectively, the allocation aims to deliver diversified, inflation-sensitive returns through both income generation and capital appreciation across real asset categories.

E. Sensitivity to Interest Rate Risk

The System's investments' sensitivity to interest rates at June 30, 2025, were as follows:

Investment Type	Fair Value	Option Adjusted Duration (yrs)	Percentage of Fixed
Asset-Backed Securities	$31,710,012	2.7	10.4%
Corporate Bonds	38,764,635	0.7	12.7%
International Bonds	66,287,708	9.3	21.7%
U.S. Government Obligations	168,520,047	7.4	55.2%
Total Fixed Income	**$305,282,402**	6.4	**100.0%**
Short-Term Investments			
Cash and Cash Equivalents	($121,457,607)	0.0	
Police STIF*	98,097,397	0.1	
Total Short-Term Investments	**($23,360,210)**		

*Short-Term Investment Funds

The duration of the System's overall fixed income portfolio excluding pooled funds was 13.66 years for the separately managed accounts. The Barclays Capital Aggregate Bond Index (BCAG) established option-adjusted duration was 5.86 years. Commingled funds would alter the duration number above. The increase to 13.66 represents the option-adjusted duration, primarily driven by investments in TIPS and, on a levered basis, these factors contribute to the higher duration figure.

F. Short-term Investments

The short-term investments of ($23.4) million includes a position of $98.1 million of commingled cash held by our investment managers and cash held by the System in an enhanced short-term investment fund managed by BlackRock. The negative number is a result of the leverage employed at the portfolio level. Modest leverage is utilized to gain additional portfolio diversification and cash efficiency. Short-term investments also include repurchase agreements, which are generally considered safe investments because the security in question functions as collateral. Classified as a money-market instrument, a repurchase agreement functions in effect as a short-term, collateral-backed, interest-bearing loan. The buyer acts as a short-term lender, while the seller acts as a short-term borrower. The securities being sold are the collateral. Thus, secured funding and liquidity, are met.

G. Quality Ratings

The System's investment quality ratings at June 30, 2025, for the separately managed fixed income accounts, were as follows:

Type of Investment	Fair Value	Ratings	Percentage of Fixed
U.S. Government Obligations	168,520,047		55.2%
Asset-Backed Securities	247,470	AAA	0.1%
	5,405,607	AA	1.8%
	1,891,769	BBB	0.6%
	3,423,548	BB	1.1%
	510,538	B	0.2%
	24,968	CCC	0.0%
	20,206,112	Unrated	6.6%
Corporate and Other Bonds	30,395	AA	0.0%
	81,710	B	0.0%
	38,652,530	Unrated	12.7%
International Bonds	2,340,555	AAA	0.8%
	1,740,417	BBB	0.6%
	62,206,736	Unrated	20.3%
Total Fixed Income	**305,282,402**		**100.0%**
Short-Term Investments			
Cash and Cash Equivalents	(121,457,607)	Unrated	
Police STIF*	98,097,397	Unrated	
Total Short-Term Investments	**(23,360,210)**		

*Short-Term Investment Funds

As of June 30, 2025, the fixed income portfolio, excluding pooled funds, consisted of 59.0 percent invested in investment grade securities, 1.3 percent invested in securities rated below-investment-grade and 39.7 percent invested in unrated securities.

The BCAG is the standard benchmark against which the industry and the System's Board measures its fixed income portfolio performance and volatility. The System's fixed income managers have discretion, within circumscribed limits, to extend the duration of their portfolios beyond that of the BCAG if they forecast falling interest rates (and thus higher bond prices). Conversely, if managers anticipate that the general level of interest rates will rise, they have the ability to shorten the duration of their portfolio and thus reduce the portfolio's sensitivity to rising rates.

H. Foreign Currency Risk

The Foreign Currency Risk is the risk that changes in exchange rates will adversely affect the fair value of the international investments. A portion of the developed markets currency exposures is hedged. The System's investments at June 30, 2025, held in currencies other than U.S. dollars were as follows:

International Securities	Short-Term Investments & Other	Convertible & Fixed Income	Equity	Total
Australian Dollar	$51,358	$1,470,725	$3,968,368	$5,490,451
Brazil Real	2	154,501	417,490	571,993
Canadian Dollar	105,617	1,869,726	4,778,981	6,754,324

Thailand Baht	-	-	358,310	358,310
Turkish Lira	-	-	183,624	183,624
Grand Total	**($18,023,348)**	**$66,303,821**	**$89,958,806**	**$138,239,279**

I. Derivative Financial Instruments

In accordance with the Board's investment policies, the System regularly invests in derivative financial instruments in the normal course of its investing activities to enhance return on investment and manage exposure to certain risks within the System. The System also enters into derivative transactions to gain exposure to currencies and markets where derivatives are the most cost- effective instrument. Derivative instruments are financial contracts whose values depend on the values of one or more underlying assets, reference rates or financial indices. The System had exposure to various derivatives including asset-backed securities, collateralized mortgage obligations (CMOs), exchange-traded futures contracts, forward currency contracts, options, swaps and floating rate securities. Some securities, such as structured notes, can have derivative-like characteristics where the return may be linked to one or more indexes. Asset-backed securities, such as CMOs, are sensitive to changes in interest rates and pre-payments. It should also be noted that the System has exposure to derivatives indirectly through its ownership interests in certain hedge funds, mutual funds and commingled funds which may use, hold or write derivative financial instruments.

Derivative investments may involve, to varying degrees, elements of credit and market risk in excess of amounts recognized on the financial statements. Market risk results from the fluctuations in interest rates and currency rates. The credit risk of these investments is associated with the creditworthiness of the related parties to the contracts. The System could be exposed to risk if the counterparties to the contracts are unable to meet the terms of the contracts. Holders of futures contracts look to the exchange for performance under the contract and not to the other party holding the offsetting futures position. Accordingly, the amount at risk due to nonperformance of counterparties to futures contracts is minimal. For counterparties involving over the counter derivatives, the Board seeks to control this risk through counterparty credit evaluations, counterparty credit limits, and exposure monitoring procedures conducted by investment managers and staff.

At June 30, 2025, the System held the following four types of derivative financial instruments: futures, swaps, currency forwards and options. These four types of derivatives provide the System with the opportunity to build passive benchmark positions, enhance returns, and gain market exposure to various indices in a more efficient way and at lower transaction costs. Credit risks depend on whether the contracts are exchange-traded or exercised over-the-counter. Market risks arise from adverse changes in market prices, interest rates and foreign exchange rates.

Investment managers are prohibited from purchasing securities on margin or using leverage unless specifically permitted within the investment manager's guidelines. Derivative instruments covered under the scope of GAAP are reported at fair value. The change in fair value of derivative instruments that are used for investment purposes are reported within the investment revenue classification. Gains and losses on derivative securities are determined based upon fair values as determined by our custodian and recorded in the Statement of Changes in Fiduciary Net Position.

Futures

Futures contracts are contracts to deliver or receive securities at a specified future date and at a specified price or yield. Futures contracts are traded on organized exchanges (exchange-traded) and typically require an initial margin (collateral) in the form of cash or marketable securities. The net change in the futures contract value is settled daily, in cash, with the exchanges. The net gains or losses resulting from the daily settlements are included in the System's financial statements. Holders of futures contracts look to the exchange for performance under the contract and not to the entity holding the offsetting futures position. Accordingly, the amount at risk posed by nonperformance of counterparties to futures contracts is minimal.

The notional value of the System's investment in futures contracts at June 30, 2025, were as follows:

Types of Futures	Base Exposure	Notional Cost
Cash and Cash Equivalents		
Long	$9,218,478	$8,581,970
Short	(97,592,204)	(95,651,968)
Commodity		
Long	118,607,783	118,059,366
Equity		
Long	209,246,833	202,368,445
Fixed Income Securities		
Long	210,333,584	206,681,541
Short	(7,309,700)	(7,158,843)
Total	**$442,504,774**	**$432,880,511**

Swaps

The System enters into several types of swap contracts, in which two counterparties agree to exchange one stream of payments for another over some agreed to period of time. Swaps are used to manage risk and enhance returns. All counterparties are rated A or better. The following is the information on the System's swap contracts outstanding at June 30, 2025:

Fixed Income Securities Swaps	Fair Value	Base Exposure
Cleared Interest Rate Swaps	$656,877	$562,463
Cleared Inflation Swaps	40,543	40,543
Total	**$697,420**	**$603,006**

Currency Forwards

Currency forwards represent foreign exchange contracts. They are used to affect settlements and to protect the base currency value of portfolio assets denominated in foreign currencies against fluctuations in the exchange rates of those currencies, or to gain exposure to the change in fair value of a specific currency. A forward foreign currency exchange contract is a commitment to purchase or sell a foreign currency at a future date and at a negotiated price. The credit risk of currency contracts that are exchange-traded lies with the clearinghouse of the exchange where the contracts are traded. The credit risk of currency contracts traded over-the counter lies with the counterparty, and exposure usually is equal to the unrealized profit on in-the money contracts. All counterparties are rated A or better. The market risk in foreign currency contracts is related to adverse movements in currency exchange rates.

The following is the summary information on the System's currency forward contracts at June 30, 2025:

Foreign Currency Contracts Purchased	Notional (Local Currency)	Cost	Fair Value Payable in U.S. Dollars	Unrealized Gain/(Loss)
Australian Dollar	($4,294,292)	($2,780,932)	($2,815,184)	($34,252)
Canadian Dollar	(5,030,059)	(3,665,754)	(3,689,587)	(23,833)
Euro Currency Unit	(33,509,402)	(38,421,685)	(39,383,837)	(962,152)

J. Securities Lending

The Board of Trustees' policies permit the System to lend its securities to broker/dealer and other entities (borrowers) for collateral that will be returned for the same securities in the future. The System's custodian is the agent in lending the plan's domestic securities for collateral of 102.0 percent and international securities of 105.0 percent of the fair value. The custodian receives cash or securities as collateral from the borrower. All securities loans can be terminated on demand by either the System or the borrower. Securities received as collateral are not reported as assets and liabilities on the balance sheets since the Retirement System does not have the ability to pledge or sell the collateral securities absent borrower default.

The System did not impose any restrictions during fiscal year 2025 on the amounts of loans the lending agent made on its behalf. At June 30, 2025, the System had no credit risk exposure to borrowers because the amounts the System owed the borrowers exceeded the amounts the borrowers owed the System. The custodian provides full indemnification to the System for any losses that might occur in the program due to the failure of a broker/dealer to return a borrowed security or failure to pay the System income earned on the securities while on loan. Cash collateral is invested in a separate account with the lending agent which includes a larger allocation to equity repurchase securities.

At June 30, 2025, cash collateral had a weighted-average maturity of one day. The maturities of the resulting investments generally match the maturities of the securities lending arrangements. While the System bears no credit risk from the failure of a borrower to return a borrowed security, it does bear risk from investing the collateral.

The following represents the balances relating to the securities lending transactions at June 30, 2025:

Securities Lent	Underlying Securities	Cash Collateral Investment Value	Securities Collateral Investment Value
Lent for Cash Collateral			
Common and Preferred Stock	$647,990	$668,974	$ -
Lent for Securities Collateral			
U.S. Government Securities	9,518,104	-	10,485,436
Common and Preferred Stock	9,901,745	-	10,830,596
Total Securities Lent	**$20,067,839**	**$668,974**	**$21,316,032**

Note 4. Net Pension Liability, Actuarial Methods and Assumptions

A. Net Pension Liability

The components of the net pension liability at June 30, 2025, were as follows:

Total Pension Liability	$2,544,012,059
Plan Fiduciary Net Position	1,966,417,163
Net Pension Liability	$577,594,896
Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	77.30%

B. Actuarial Methods and Assumptions

The Total Pension Liability was determined by an actuarial valuation as of June 30, 2025, using the following actuarial assumptions, applied to all periods included in the measurement.

Entry Age Normal, Level Percent of Payroll	
Discount Rate, Net of Plan Investment Expenses	6.75%
Inflation	2.25%
Salary Increase; Including Inflation	2.25% + merit
Investment Rate of Return, Net of Plan Investment Expenses	6.75%
Municipal Bond Rate	N/A
Projected Period of Unfunded Benefit Payments	None

The actuarial assumptions used have been recommended by the actuary and adopted by the System's Board of Trustees based on the most recent review of the System's experience presented at a Board meeting on September 9, 2021.

The rate of employer contributions to the System is composed of normal cost, amortization of the unfunded actuarial accrued liability, and an allowance for administrative expenses. The normal cost is a level percent of payroll cost which, along with the member contributions, will pay for projected benefits at retirement for each plan participant. The actuarial accrued liability is that portion of the present value of projected benefits that will not be paid by future normal employer costs or member contributions. The difference between this liability and the funds accumulated as of the same date is the unfunded actuarial accrued liability. The allowance for administrative costs is based upon the System's actual administrative expenses.

The County is required to contribute at an actuarially determined rate; the rate for the year ended June 30, 2025 was 57.57 percent of annual covered payroll which was adopted for fiscal year 2025.

Mortality rates with adjustments for mortality improvements were based on 100% of the PubS-2010 Healthy Annuitant Head-Count Weighted Mortality Table for males and females for participants (non- beneficiary/ survivor) and 100% of the PubG-2010 Healthy Annuitant Head-Count Weighted Mortality table for beneficiaries projected using theMP-2020 model, with an ultimate rate of 0.85% for ages 20-80 grading down to an ultimate rate of 0% for ages 114-120 and convergence to the ultimate rate in the year 2027. 20 percent of pre-retirement deaths are assumed to be service connected.

The actuarial assumptions used in the June 30, 2025, valuation were based on the results of an actuarial experience study for the period July 1, 2015 to June 30, 2020.

C. Long Term Expected Rate of Return

The long term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Best estimates of return for each major asset

class included in the System's target asset allocation as of June 30, 2025, are summarized below.

Asset Class	Long Term Expected Return
Absolute Return	5.4%
Core Fixed Income	4.7%
High Yield	6.0%
International Developed Mkt. Equities	6.0%
International Emerging Mkt. Equities	6.5%
Real Assets	6.0%
Risk Parity	5.1%
U.S. Equity	5.2%
Gold	4.5%

D. Discount Rate

The discount rate used to measure the total pension liability was 6.75 percent. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that County contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

In making this determination, we assumed the outflows would equal the anticipated benefit payments from the 2025 actuarial valuation. The administrative expenses attributable to current actives were assumed to equal 0.50 percent of covered payroll. The inflows to the Plan were assumed to continue at the member rate for the 2025 active population of 8.65 percent of payroll, and County contributions were projected at 61.37 percent for fiscal year 2026 and increasing to 63.20 for 2028-2037. After that time, the County contribution is assumed to decrease to the normal cost, plus expenses (18.15 percent) and amortization of any remaining experience gains and losses.

E. Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the County, calculated using the discount rate of 6.75 percent, as well as what the County's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75 percent) or 1-percentage-point higher (7.75 percent) than the current rate.

Sensitivity of Net Pension Liability			
	1% Decrease 5.75%	Discount Rate 6.75%	1% Increase 7.75%
Total Pension Liability	$2,894,600,660	$2,544,012,059	$2,257,907,543
Plan Fiduciary Net Position	1,966,417,163	1,966,417,163	1,966,417,163
Net Pension Liability	$928,183,497	$577,594,896	$291,490,380
Plan Fiduciary Net Position as a Percentage of the Total Pension Liability	67.93%	77.30%	87.09%

Note 5. Subscription Payable

As of June 30, 2025, the Authority had four active subscriptions ranging from a 24 to 57 months period with an incremental borrowing rate of 1.894 to 2.186 percent. As of June 30, 2025, the total combined value of the subscription liability is $38,939. The combined value of the right to use asset, as of June 30, 2025 of $304,164 with accumulated amortization of $229,798 is included within the Subscription Class activities table found below. The subscriptions had $0 of Variable Payments and $0 of Other Payments, not included in the Subscription Liability, within the Fiscal Year. For additional information, refer to the disclosures below.

The following tables outline the subscription asset and liability activity for the year ended June 30, 2025, and the subscription liability requirements to maturity as of June 30, 2025.

Subscription Schedule

Asset Class	Balance June 30, 2024	Additions	Reductions	Balance June 30,2025
Subscription being amortized				
Subscription assets	$202,336	$101,828	$ -	$304,164
Total Subscriptions assets	**202,336**	**101,828**	**-**	**304,164**
Less accumulated amortization				
Subscription assets	101,359	128,439	-	229,798
Total accumulated amortization	**101,359**	**128,439**	**-**	**229,798**
Total Subscription Assets, net of amortization	**100,977**	**(26,612)**	**-**	**74,366**
Subscription asset liability	88,000	43,711	92,772	38,939
Total Subscription Liability	**$88,000**	**43,711**	**$92,772**	**$38,939**

Principal and Interest Requirements to Maturity

Fiscal Year	Principal Payments	Interest Payments	Total Payments
2026	$37,351	$930	$38,281
2027	1,588	49	1,637
Total Principal and Interest	**$38,939**	**$979**	**$39,918**

Note 6. Income Taxes

The Internal Revenue Service issued the System a determination letter which stated that the System and its underlying trust qualify under the applicable provisions of the Internal Revenue Code and therefore are exempt from federal income taxes.

Notes to the Required Supplementary Information

Valuation Date	June 30, 2023
Timing	Actuarially determined contribution rates are calculated based on the actuarial valuation one year prior to the beginning of the fiscal year

Key Methods and Assumptions Used to Determine Contribution Rates:

Actuarial cost method	Entry Age Normal, Level Percent of Payroll
Asset valuation method	33% of Aggregate Gain/Loss is recognized
Amortization method	Closed 15-year layers, with level % of payroll
Discount rate	6.75%
Amortization growth rate	2.25%
Price inflation	2.25%
Salary increases	2.25% plus merit component based on employee's years of service
Mortality	Mortality (Active): PubS-2010 Employee Head-Count Weighted Mortality Table for males and females; Mortality (Healthy Retirees): PubS-2010 Healthly Annuitant Head-Count Weighted Mortality Table for males and females; Mortality (Beneficiaries): PubG-2010 Healthly Annuitant Head-Count Weighted Mortality Table for males and females; Mortality (Disabled): PubS-2010 Disabled Head-Count Weighted Mortality Table for males and females all projected using the MP-2020 model, with an ultimate rate of 0.85% for ages 20-80 grading down to an ultimate rate of 0% for ages 114-120 and convergence to the ultimate rate in the year 2027

A complete description of the methods and assumptions used to determine contribution rates for the year ending June 30, 2025 can be found in the June 30, 2023 actuarial valuation report.

Required Supplementary Information

Summary of Significant Changes to the Pension System

The summary of employer and employee contribution rates during the past five years and other significant changes in the pension system were as follows:

Contribution Rates		
Fiscal Year	**Employer**	**Employee**
2025	57.57%	8.65%
2024	50.87%	8.65%
2023	46.04%	8.65%
2022	46.04%	8.65%
2021	41.60%	8.65%

July 2019	New hires on or after July 1, 2019, are enrolled in Plan C.
December 2018	Retirement Board of Trustees approved a new plan for all employees hired on or after July 1, 2019.
July 2014	Member contribution rate decreased from 10 percent to 8.65 percent.

Report of Independent Auditor on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Board of Supervisors
County of Fairfax, Virginia

To the Board of Trustees
Fairfax County Police Officers' Retirement System

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the Fairfax County Police Officers Retirement System (the "System"), a fiduciary component unit of the County of Fairfax, Virginia, as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the System's basic financial statements, and have issued our report thereon dated November 19, 2025.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the System's internal control over financial reporting ("internal control") as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control. Accordingly, we do not express an opinion on the effectiveness of the System's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

Report on Compliance and Other Matters
As part of obtaining reasonable assurance about whether the System's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards.*

Purpose of this Report
The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

County of Fairfax, Virginia

To protect and enrich the quality of life for the people, neighborhoods and diverse communities of Fairfax County

October 20, 2025

Dear Members of the Board of Trustees:

The fiscal year ending June 30, 2025, was characterized by significant market volatility, policy shifts, and strong recoveries across asset classes. Global equity markets rebounded sharply in the second quarter of 2025 following steep declines earlier in the year, driven by easing trade tensions and fiscal stimulus in Europe. Fixed income markets experienced spread compression and strong yields, while real assets such as gold and midstream energy posted robust returns. Private equity and venture capital deal activity surged, although fundraising remained mixed. Real estate markets showed signs of stabilization, with private real estate returning to modest appreciation. Overall, diversified portfolios benefited from strategic asset allocation and liquidity management amid ongoing macroeconomic uncertainty.

U.S. equities experienced a turbulent fiscal year, with performance varying significantly across quarters and market segments. During the third and fourth quarters of 2024, U.S. equity markets demonstrated both resilience and volatility. In Q3 2024, the S&P 500 Index advanced 5.9% and the Russell 2000 returned 9.3%, reflecting a broad-based rally across sectors such as financials, industrials, and healthcare. Value stocks notably outperformed growth, and small-cap stocks rebounded strongly, supported by renewed investor confidence and robust earnings in select industries. However, Q4 2024 saw a moderation in gains, with the S&P 500 posting a 2.4% increase and the Russell 2000 rising only 0.3%. Domestic equities outperformed their international peers, benefiting from relative economic stability and a strong U.S. dollar, even as global volatility persisted. These quarterly trends set the stage for the fiscal year's overall recovery, with growth-oriented sectors leading the rebound despite periods of uncertainty and shifting market sentiment.

The S&P 500 Index posted a strong annual return of 15.2% as of June 30, 2025, despite a sharp decline of 4.3% in the first quarter of 2025 due to tariff concerns. The index rebounded with gains of 10.9% in the second quarter of 2025, supported by easing trade tensions and fiscal stimulus. Large-cap growth stocks outperformed, with the Russell 1000 Growth Index surging 17.8% in Q2 and delivering a 17.2% annual return. In contrast, the Russell 1000 Value Index posted a more modest 3.8% gain in Q2 and a 13.7% annual return. Small-cap stocks, represented by the Russell 2000 Index, faced greater volatility, declining 9.5% in Q1 but recovering with an 8.5% gain in Q2, resulting in a 7.7% annual return. Overall, U.S. equity markets demonstrated resilience amid macroeconomic challenges, with growth-oriented sectors leading the recovery.

Global equity markets experienced significant fluctuations throughout the fiscal year ending June 30, 2025. Global equity markets reflected a mix of optimism and volatility in the second half of 2024. Q3 2024 was marked by strong gains across international and emerging markets, with the MSCI EAFE Index rising 7.3% and the MSCI Emerging Markets Index up 8.7%. China was a standout, surging 23.5% on the back of a robust stimulus package, which drove emerging market performance and investor appetite for risk. However, Q4 saw international equities decline, as the MSCI EAFE Index fell 8.1% and the MSCI Emerging Markets Index dropped 8%. These declines were largely attributed to rate cuts by the European Central Bank, which increased market volatility and strengthened the U.S. dollar, weighing on returns outside the United States. Despite these challenges, global equities contributed positively to diversified portfolios over the fiscal year, with emerging markets and select international sectors providing important sources of return and diversification.

Fixed income markets experienced notable volatility during the fiscal year, driven by tariff policy and interest rate expectations. The fixed income landscape during Q3 2024 and Q4 2024 was shaped by significant policy actions and market volatility. In Q3, the Federal Reserve implemented a 50-basis point rate cut, which led to a rally in long-dated bonds and a steepening of the yield curve. The Bloomberg U.S. Long Treasury Index posted a 7.8% gain, and credit spreads tightened, reflecting strong investor demand for fixed income assets. Q4, however, saw a reversal, with Treasury yields rising sharply and the Bloomberg Aggregate Bond Index declining by 3.1%. Despite this selloff, high yield and emerging market debt remained resilient, with the Bloomberg U.S. Corporate High Yield Index gaining 0.2% for the quarter and 8.2% for the year. These developments underscored the importance of active management and diversification within fixed income portfolios during periods of heightened uncertainty, as investors navigated shifting interest rate expectations and credit market dynamics.

In Q1 2025, Treasuries rallied and credit spreads widened, but most indexes remained positive, with the Bloomberg Aggregate Bond Index up 2.8%. The Bloomberg Global Aggregate Index rebounded in Q2 with a 4.5% gain, contributing to an annual return of 8.9%. High yield and emerging market debt posted strong returns, with the Bloomberg High Yield Index up 3.5% in Q2 and 10.3% for the year ending June 30, 2025.

Real assets delivered mixed results in the latter half of 2024. Q3 2024 saw commodities post modest gains, with the Bloomberg Commodity Index up 0.7% and gold returning 13.2%. Midstream energy also performed well, as the Alerian Midstream Index rose 9.7%. Real estate investment trusts rebounded, with the NAREIT Global REIT Index up 16.2%, and private real estate posted its first positive quarterly return after two years of declines. In contrast, Q4 was more challenging, with commodities down 0.4% and gold flat. Crude oil bounced back with a 4.3% gain, while midstream energy continued to lead with a 13.5% increase. REITs declined sharply, and private real estate remained modestly positive, with the NFI-ODCE Index reporting a 1.2% gross return. These trends highlight the importance of strategic allocation and the role of real assets in providing diversification and inflation protection, especially as market conditions and sector performance varied widely across quarters.

Gold and midstream energy were standout performers during the fiscal year ending June 30, 2025, with gold spot prices up 39.4% and the Alerian Midstream Index gaining 31.6% as of that date. Commodities were volatile, with the Bloomberg Commodity Index down 3.1% in Q2 but up 5.8% for the year. Infrastructure equities posted strong gains, with the S&P Global Infrastructure Index up 10.4% in Q2 and 15.3% for the year. REITs showed signs of stabilization, with the NAREIT Global REIT Index up 3.0% in Q2 and 10.8% for the year. Private real estate returns turned modestly positive, with the NFI-ODCE Index reporting a 1.0% gross return in Q2.

Overall, real assets benefited from diversification and strategic allocation amid macroeconomic uncertainty.

Private equity and venture capital markets experienced a surge in deal activity during the fiscal year. Private equity and venture capital markets were active throughout Q3 2024 and Q4 2024, with deal activity and exits reaching significant levels. In Q3, U.S. private equity fundraising totaled $236.3 billion year-to-date, and venture capital fundraising reached $65.1 billion. Deal activity was robust, with private equity deals amounting to $650.2 billion and exits totaling $107.1 billion. Q4 saw a slowdown in fundraising, with private equity raising $287.3 billion for the year and venture capital $76.1 billion, both below prior year levels.

In Q2 2025, U.S. private equity new deal activity reached $506.7 billion, while venture capital deals totaled $162.8 billion, marking record highs. Exit activity remained strong, with private equity exits totaling $339.8 billion across 732 transactions and venture exits reaching $120.1 billion across 756 deals. Fundraising was mixed, with private equity raising $149 billion and venture capital raising $26.6 billion in Q2, both slightly down from the previous year. Earlier quarters showed similar trends, with fundraising slowing in Q1 but deal activity and exits hitting record levels.

Police Officers Retirement System

The Police Officers Retirement System operates a balanced and diversified investment program with disciplined asset re-balancing to achieve strategic long-term goals. This disciplined investment process has been effective in achieving a long-term record of consistent asset growth.

As of June 30, 2025, the Fairfax County Police Officers Retirement System stood at $1.971 billion, up from $1.825 billion at the end of fiscal year 2024. Using a time-weighted rate of return, the system returned +8.88% (net of fees) for the year ending 2025. Over the three-, five-, and ten-year annualized periods, the system returned +5.18%, +9.03%, and +6.26% (net of fees), respectively.

Over the past twelve months, the System continued to prioritize risk diversification. In support of this objective, Man AHL Potomac was added to the Absolute Return allocation. Additionally, the Private Equity lineup was expanded with the additions of DataTribe Fund III, Frazier Fund XIII, Polychain Fund IV, Sands Global Innovation Fund III, and Sands Life Sciences Fund III.

Sincerely,

Katherine Molnar, CFA

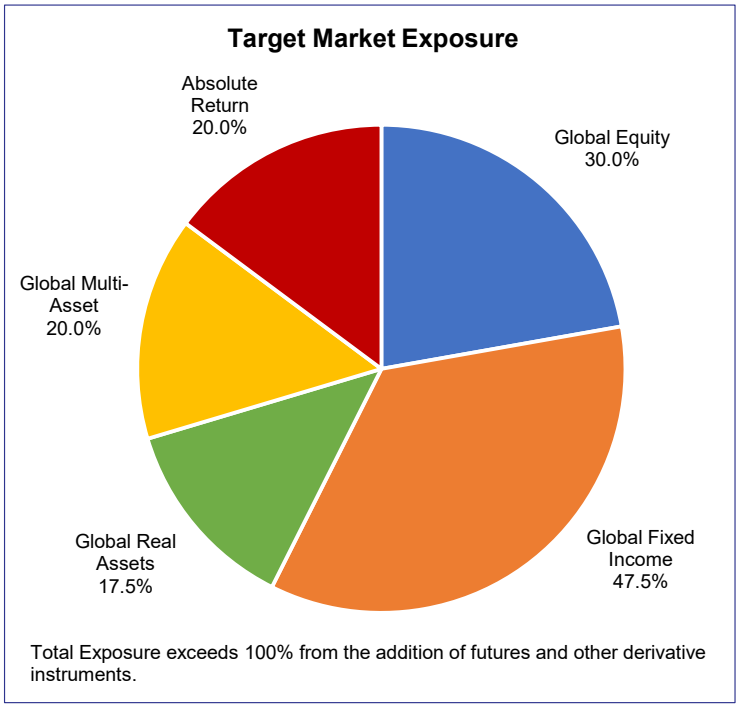
Police Officers Retirement System – Allocation of Capital Exposures

Target Asset Allocation

The asset structure shown below represents the Trustees' assessment of their optimal asset allocation as of June 30, 2025. The target asset allocation provides a reasonable expectation that the System's investment objectives can be achieved based on historical relationships of asset class performance.

The pie chart below details the target asset mix, consistent with the achievement of the long-term objectives of the System, as of June 30, 2025.



Total Exposure exceeds 100% from the addition of futures and other derivative instruments.

Actual Asset Allocation as of June 30, 2025

The asset structure of the Police Officers Retirement System has historically reflected a proper balance of the System's needs for liquidity, growth of assets, and risk tolerance. The System's investment policy is designed to continue to meet its long-term investment objectives while, at the same time, providing sufficient flexibility to meet short-term funding requirements.

The pie chart below details the target asset mix, consistent with the achievement of the long-term objectives of the System, as of June 30, 2025.

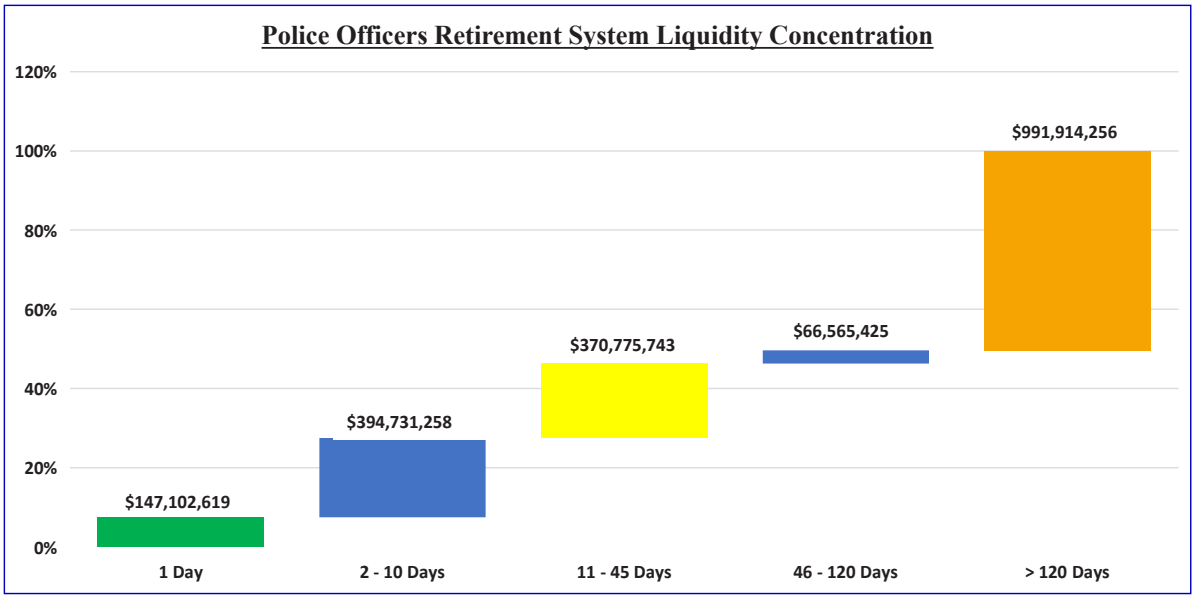
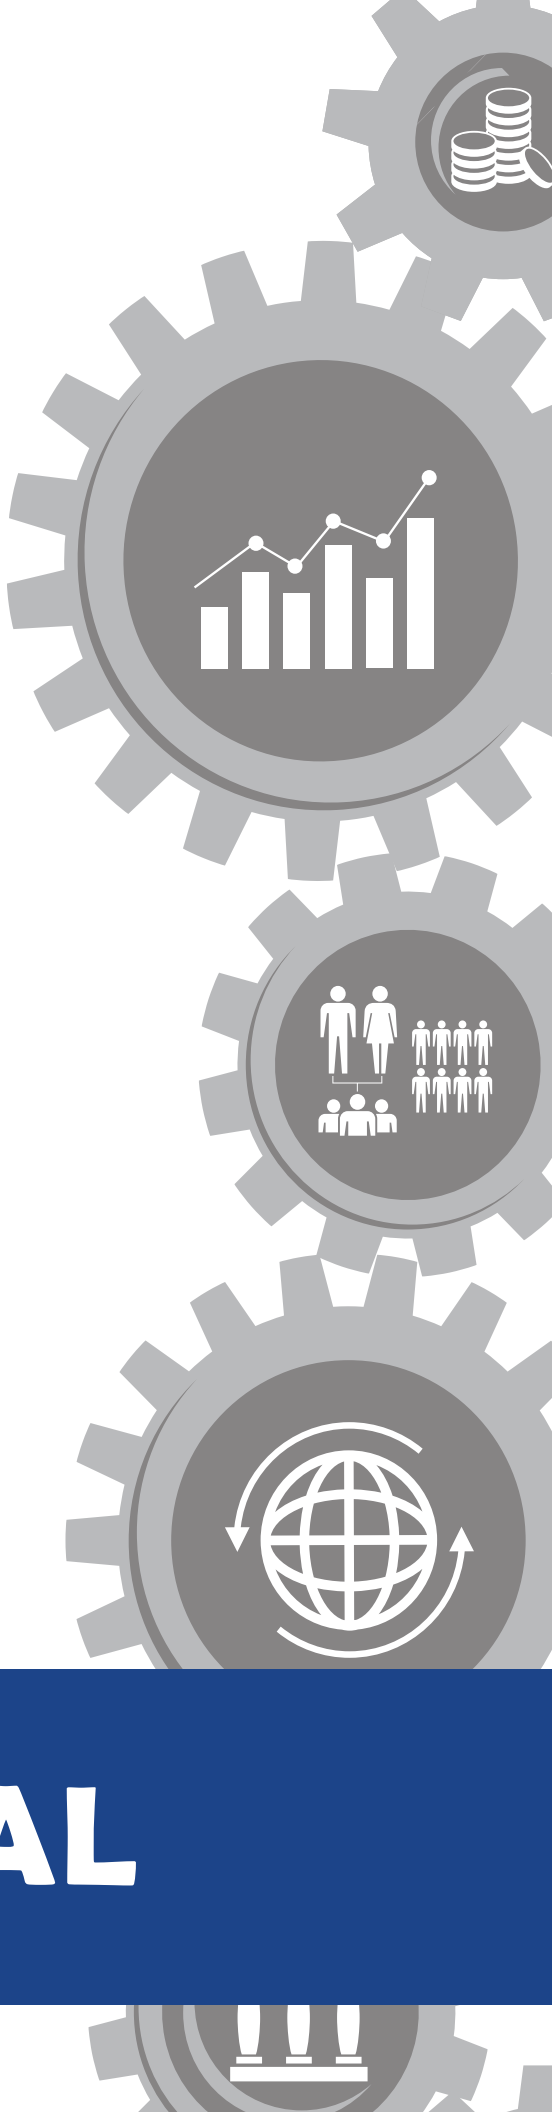
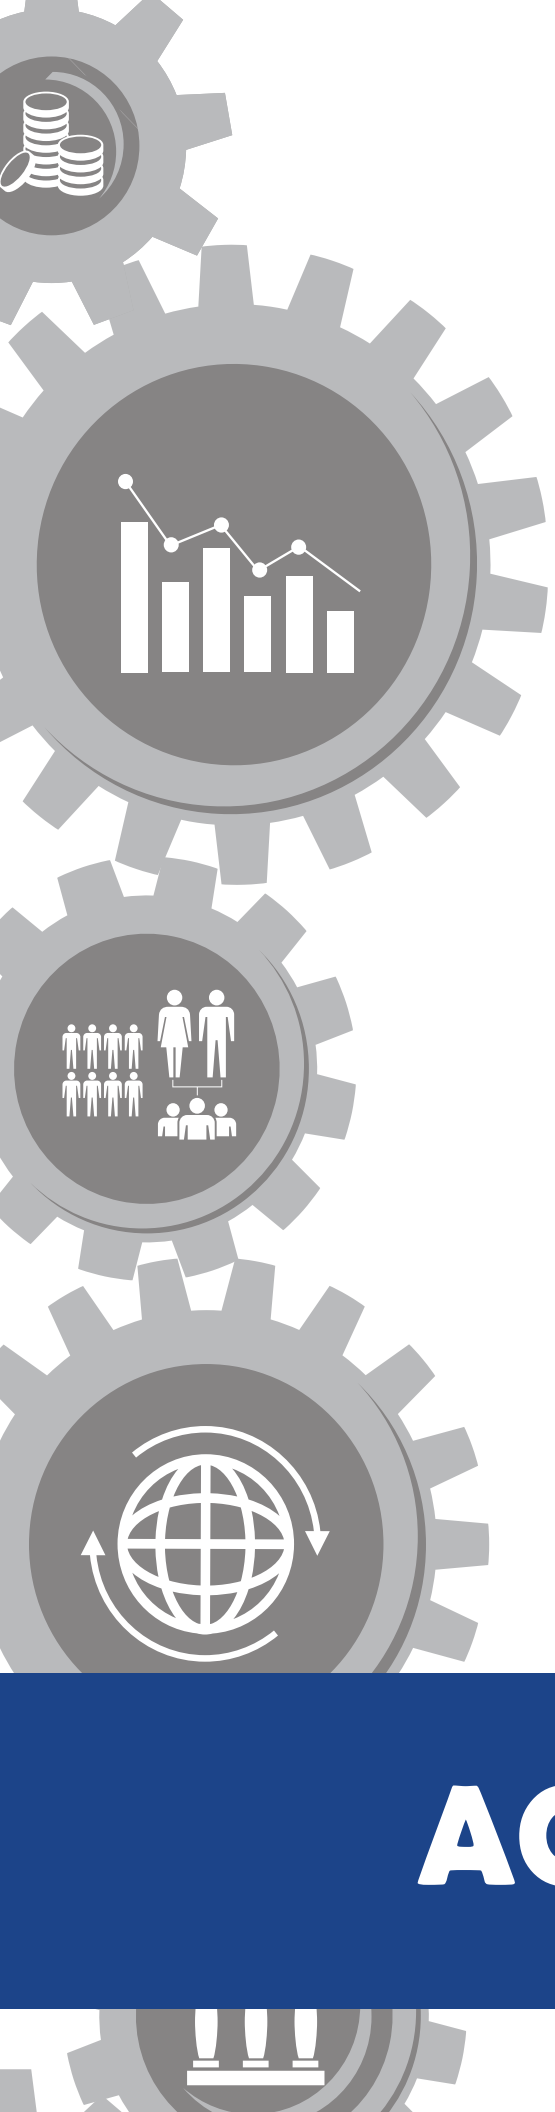
Liquidity Snapshot on June 30, 2025

The below liquidity chart for the Police Officers Retirement System demonstrates how the pension fund's capital has been allocated to ensure sufficient liquidity to support short term uses of cash, such as retirement distributions, capital calls, potential daily margin calls and coverage ratio requirements on derivative notional balances. It details the liquidity concentration of the System's total capital allocated to investments by their redemption schedule (monthly, quarterly, annually or none), including the number of calendar days' notice that must be provided before the redemption of funds can be made.





ACTUARIAL



ACTUARIAL

October 14, 2025

Fairfax County Police Officers
Retirement System
12015 Route 50, Suite 350
Fairfax, Virginia 22033

Dear Members of the Board:

At your request, we have performed an actuarial valuation of the Fairfax County Police Officers Retirement System as of June 30, 2025. The full results and analysis of that annual valuation will be presented in a full actuarial valuation report. The purpose of this actuarial section is to provide key information from that report and support the disclosure of Total Pension Liability that is presented in the Financial Section of this ACFR. For a more complete analysis, please see the full report.

Funding Objective
The funding objective of the System is to establish contribution rates that will remain level as a percentage of payroll over time. In order to achieve this, the County contribution rate is based on the normal cost rate and expense rate developed in the current valuation combined with an unfunded actuarial liability rate (UAL rate) based on 15-year layered amortization bases reflecting assumption changes, Plan changes, and annual gains and losses.

Assumptions
The actuarial assumptions used in performing the June 30, 2025 valuation were recommended by the actuary and adopted by the Board of Trustees based on our most recent review of the System's experience for the five-year period ending June 30, 2020. The assumptions and methods used for funding purposes were developed in compliance with the actuarial standards of practice as they relate to pension plans. The assumptions reflect our understanding of the likely future experience of the System, and the assumptions both individually and as a whole represent our best estimate for the future experience of the System. The results of this report are dependent upon future experience conforming to these assumptions. To the extent that future experience deviates from the underlying assumptions, the results would vary accordingly.

Reliance on Others
In preparing our valuation, we relied on information (some oral and some written) supplied by the System. This information includes, but is not limited to, Plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standards of Practice No. 23.

Supporting Schedules
As a part of the 2025 actuarial valuation, Cheiron prepared the Analysis of Financial Experience, Schedule of Retirees and Beneficiaries Added to and Removed from the Rolls and Liability by Type provided in this Actuarial Section.

We are also responsible for the disclosures of Net Pension Liability and its components in the Financial Section. The information provided in Note 4 of the Financial Section comes from the Actuarial Valuation as of June 30, 2025.

Compliance with Code of Virginia §51.1-800

Code of Virginia §51.1-800 requires that the benefits provided to a retiree at age 65 from a local retirement system equal or exceed two-thirds of the allowance to which the employee would be entitled under the provisions of the Virginia Retirement System (VRS).

Although there is no formal procedure for making this comparison, we compared the least valuable rate under the Police Officers Retirement System to the most valuable accrual rate under the VRS, making adjustments for the fact that employee contributions are required in excess of the VRS 5% rate. We found that the employer-provided accrual rates do exceed two-thirds of the most valuable employer-provided accrual rates under the VRS plan.

We certify that, to the best of our knowledge and understanding, the Fairfax County Police Officers Retirement System satisfies the requirements of the Code of Virginia §51.1-800.

Certification

This section and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices, and our understanding of the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board, as well as applicable laws and regulations. Furthermore, as credentialed actuaries, we meet the Qualification Standards of the American Academy of Actuaries to render the opinions contained in this section. This section does not address any contractual or legal issues. We are not attorneys, and our firm does not provide any legal services or advice.

This section was prepared for the Fairfax County Police Officers Retirement System for the purposes described herein and for the use by the plan auditor in completing an audit related to the matters herein. Other users of this section are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any other user.

Sincerely,
Cheiron

Summary of Valuation Results

The Actuarially Determined Contribution rate for Fiscal Year (FY) 2025 was developed in the 2023 valuation report. For more information on the assumptions and methods used to develop that rate, please see the Funding Method section of that report.

Amounts disclosed in Note 4 of the Financial Section were developed in conjunction with the 2025 valuation.

Summary of Actuarial Assumptions and Methods

Funding Method
The Entry Age Normal Cost funding method is used to determine costs. Under this method, the County contribution has three components: the normal cost, the payment toward the unfunded actuarial liability, and the expense rate.

The normal cost is a level percent of pay cost which, along with the member contributions, will pay for projected benefits at retirement for each plan participant.

The actuarial liability is that portion of the present value of future benefits that will not be paid by future County normal costs or member contributions. The difference between this liability and funds accumulated as of the same date is referred to as the unfunded actuarial liability. The rate includes amortization layers which exhaust the unfunded liability amount over 15-year layers from the date first measured. The amortization is performed as a level percent of pay.

The expense rate is added to cover the System's administrative expenses.

The County's total contribution rate is equal to the sum of these three components.

Actuarial Value of Assets
For purposes of determining the County contribution to the System, we use an Actuarial Value of Assets. The asset adjustment method dampens the volatility in asset values that could occur because of fluctuations in market conditions. Use of an asset smoothing method is consistent with the long-term nature of the actuarial valuation process.

In determining the Actuarial Value of Assets, we calculate an expected actuarial value based on cash flow for the year and imputed returns at the actuarial assumption. This expected value is compared to the market value, and one-third of the difference is added to the preliminary actuarial value to arrive at the final actuarial value.

Changes Since Last Valuation
None.

Long Term Assumptions Used to Determine System Costs and Liabilities

Demographic Assumptions
Healthy Mortality
Healthy Retiree Mortality

Annual Deaths Per 10,000 Members Mortality Projected to 2025

*70% of those who leave under this decrement are assumed to DROP, with the other 30% taking immediate retirement.

Merit/Seniority Salary Increase
(in addition to across-the-board increase)

Years of Service	Merit/Seniority Increase*
0	6.50%
5	3.00
10	1.00
15	2.00
20	2.50
25	1.00
30+	1.00

Family Composition

For purposes of valuing the pre-retirement death benefit, an assumption concerning how many employees are married is needed. The assumption used in this valuation is that 80% of active employees are married at death and that the female spouse is five years younger than the male spouse. In addition, each married employee is assumed to have two children, 22 and 24 years younger than the employee.

Sick Leave Credit

The unused sick leave balance as reported for each active member is used as of the valuation date. Future sick leave accruals for those hired before 2012 are assumed to accrue at 100% of each participant's annual average but are capped at 124 hours per year.

Economic Assumptions

Investment Return:	6.75% compounded per annum.
Rate of General Wage Increase:	2.25% compounded per annum.*
Rate of Increase in Cost-of-Living:	2.10% compounded per annum.**
Total Payroll Increase (For amortization):	2.25% compounded per annum.
Administrative Expenses:	0.50% of payroll.

*General Wage Increase assumption applies for projecting contributions and developing Social Security benefits.
** Benefit increases are limited to 4% per year.

Rationale for Assumptions

The actuarial assumptions were adopted by the Board of Trustees upon the recommendation of the actuary, based on an experience study performed in 2021. The results of this study were presented in a report dated October 2021 and are incorporated into the actuarial report by reference.

Changes Since Last Valuation

None.

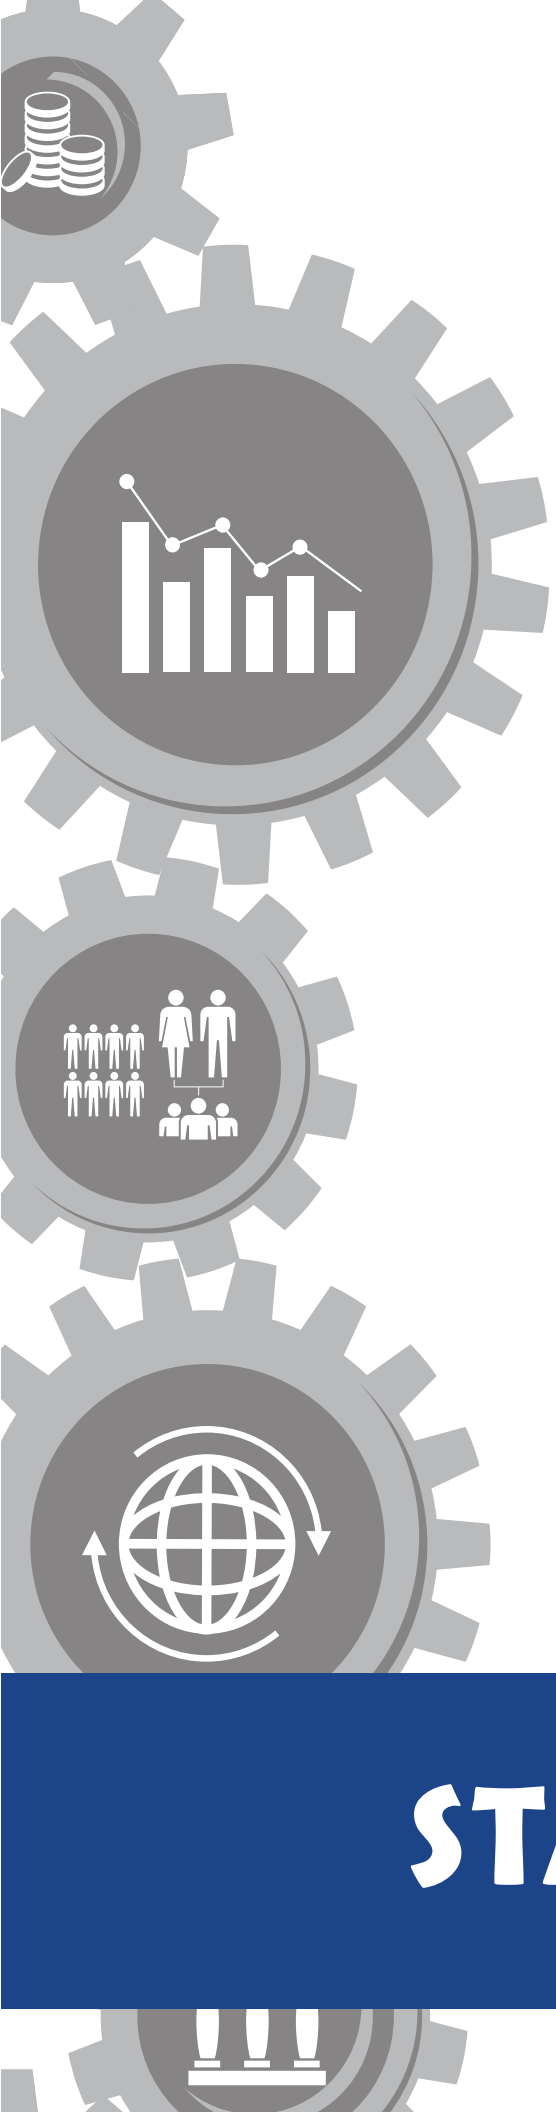
STATISTICAL



STATISTICAL

The Statistical Section presents historical information regarding the retirement plan. This information includes a ten-year analysis of the sources of change in plan fiduciary net position, benefit payments, the number of retired members and average monthly benefits. Sources of additions include employer and plan member contributions and net investment income; deductions include benefit payments to retirees and beneficiaries, refunds of employee contributions and administrative expenses. The amounts of benefits paid, the count of benefit recipients and the average benefit payments are provided by type of benefit, including service retirement annuities, service-connected and ordinary disability benefits and survivor benefits.
