Template for Architectural Diagram

SYSTEM IDENTIFICATION

Submission Date:

System Name/Title: *Name Given to the System*

System ASID: *Unique Identifier*

System Environment

Provide a general description of the technical system. Include any environmental or technical factors that raise special security concerns (dial-up lines, open internet connectivity, etc.)

Hardware Requirements

Are there any other specific hardware requirements (e.g., database servers, application servers)?

Technical Documentation

Provide a detailed architectural diagram of the system highlighting functionality specifications and entity relationship diagrams.

Note: Please submit the Architectural diagram in a Microsoft Word file derived from this template. The preferred method for creating the layout/drawing itself is Visio. After you have completed the diagram, simply drop it into the Word document derived from this template for submission.
