Notes:

1. Linear facilities includes sidewalks, paved trails, and bikeways. The appropriate type of facility will be determined during pre-scoping.
2. Spot facilities refers to crosswalks which can include signalization, markings, pedestrian refuges and/or curb bump outs. This can also include minimal segments of linear facilities to connect existing facilities to each other or
3. Proposed new crosswalks will need to meet VDOT's crosswalk warrants (see 'Crosswalk Study Needed' column).
4. RRFB is short for Rectangular Rapid Flashing Beacon, a crosswalk sign with pedestrian activated strobe lights. Certain criteria need to be met to warrant the installation of a RRFB.
